

## Web Browser Capabilities Protect Your Facilities—On Your Terms

Managed access control gives you peace of mind that someone is always watching your facility, even when you can't be there. Managed access control gives you all the benefits of a locally managed system without all the responsibility, hassle, and cost of maintaining the equipment yourself. And now, recent advances in web browser capabilities mean that you can access your information and make changes from virtually anywhere, using any Internet connection.

### WEB BROWSER CAPABILITIES:

- Lock and unlock doors
- View door status (system/individual)
- Add/remove cardholders
- Password management
- Start-on date and auto-expire option
- VIP, Supervisor, Standard, Limited use card options
- Create custom note fields
- Locate last use of card/cardholder
- Import photo IDs for badge printing
- Print ID badges
- Create and manage user and door time schedules
- Create custom access levels to determine who can go into which door
- Create and manage holiday schedules
- Create report template and schedule to run reports

### BENEFITS:

- Eliminate the hassle of managing the system yourself
- Eliminate the need for software updates and system backup issues
- Reduce training and administration time
- Reduce the need for service calls

All this, while still having the ability to access your system from anywhere, using the web: work, home or vacation, providing you with the best of both worlds.

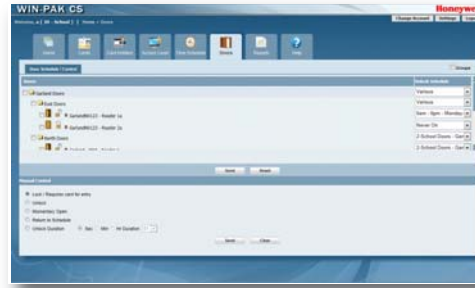

# Managed Access Control Web Browser Capabilities

## Protect Your Facilities—On Your Terms

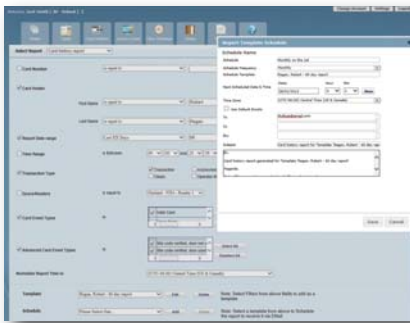

### Add or Remove Cardholders

You can add or remove a cardholder from your system instantly. All actions are real-time, so there's no need to wait for the system to refresh to see updates. You control your data.

### Manage and Monitor Doors

Do you need to keep the doors open past their normal schedule or perhaps open them for an employee who has forgotten his access card or do you need to confirm the status of your doors and locks? The door management capability lets you control and monitor your doors from anywhere!

### Run System and History Reports

Did you have an incident last night and want to see who entered the facility last? Using the report generator in the web browser, you have the ability to run reports on an event—or view your entire database history.

- Cardholder Reports
  - Who has access to this door(s)
- Door Activity
- Card Audit
- Database History
- Access Levels
- Time Schedules
- ...and more!

In addition, you can create report templates and schedules to run your reports automatically as a one-time, hourly, daily, weekly, monthly basis and you can specify the number of days to look back (example provide a weekly report for the last 10 days). All you have to do to check the latest reports is open an e-mail!

### Managed Access Control Demo

Want to see the web browser for yourself? Register below to have trained experts walk you through a live web browser demonstration and provide answers to all your questions.
