Re: Public Utility Commission of Texas Docket No. 44547 – Application of CenterPoint Energy Houston Electric, LLC to Amend a Certificate of Convenience and Necessity for a Proposed 345 kV Transmission Line within Grimes, Harris and Waller Counties

Dear <<OWNER NAME>>:

In April 2015, CenterPoint Energy Houston Electric, LLC (CenterPoint Energy) notified you that it had filed an application with the Public Utility Commission of Texas (PUC) to amend its Certificate of Convenience and Necessity (CCN). The CCN application requested authorization for CenterPoint Energy to construct new 345 kV transmission facilities on your property. The CCN application was assigned to Docket No. 44547.

The PUC issued the Order in Docket No. 44547 on January 15, 2016, in which Alternative Route 1A-Modified (Segments B, F, LA, I3, LD, N1A, K3, N1C, H2, V2A, L3, A3, C3, D3A, M3, O3, P3, Q3, and R3), was designated as the route along which CenterPoint Energy is authorized to construct the new transmission facilities. Your land is located along the approved route, and CenterPoint Energy may need to obtain additional land rights from you.

On April 14, 2016, the PUC granted a re-hearing. On April 28, 2016 the PUC issued a revised final order stating that the CenterPoint Energy project shall be constructed with monopoles except inside electric utility substations where tower structures may be used. This is the only substantive change that the PUC made to the January 15, 2016 final order.

Enclosed are a copy of the Order in Docket No. 44547, a map showing the approved route for the transmission facilities, and State of Texas Landowner's Bill of Rights, which was prepared by the Office of the Attorney General of the State of Texas.

OVER

If you have questions about this project, please contact Wes Padgett, CCN Project Manager for CenterPoint Energy at 1-800-416-9625.

Sincerely,

A handwritten signature in black ink, reading "Michael J. Pakeltis". The signature is written in a cursive style with a long horizontal flourish extending to the right.

Michael J. Pakeltis, Director
Transmission Operations
