

## **New Product: Meet the Next-Generation Clamp-on Transit-Time Flow Meter, TTFM 6.1**

### *FOR IMMEDIATE RELEASE:*

*Calgary, AB – June 1, 2018* - Carbon Controls is thrilled to announce that Greyline Instruments has introduced a new generation of their clamp-on, transit-time flow meter. New features and improved performance in difficult applications are just some of the features you can expect with the TTFM 6.1 Flow Meter.

The TTFM 6.1 provides fast, easy and accurate flow measurement for clean fluids (water, oil, and chemicals) and saves money with its low installation costs. Typical installations are thirty minutes or less and no pipe cutting is required, simply strap on.

Contact Carbon Controls today to schedule a demo or get a quote.

Greyline Instruments is a Canadian manufacturer based out of Long Sault, Ontario that started in 1986. They specialize in ultrasonic technologies. Currently they have over 80 representatives worldwide including Carbon Controls Ltd.
