

Galanta™ Steel Siding

Ideal Roofing's **Galanta™** hidden fastener interlocking steel siding is designed to protect your house or your business against harsh weather while cladding it with a durable and esthetically beautiful look.

Galanta™ is manufactured in steel panels that cover 6-1/4in. wide similar to planking assembled horizontally or vertically with a wood grain embossment in a variety of colours and are available in a length of 12ft. They can be easily cut and fitted on your job site. It is simple to install, one panel at a time, interlocking with each other without any fasteners showing.

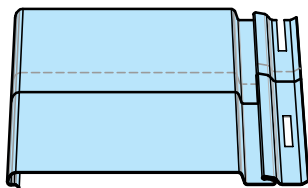

The **Galanta™** steel siding can be used to break the monotony of any exterior facade or wall cladding and blends in nicely with other high-grade or noble materials such as stone, brick, concrete, glass or wood. It offers a 40-year transferable warranty.
