For over 35 years, our windows have been custom crafted to add beauty, security, comfort and energy efficiency to your home.

Professional engineering, attention to detail, reliability, expert craftsmanship, exceptional service and choice have made us one of the leading window brands in North America, but that doesn't mean we're content to stand still. We are always innovating and investing in technology, research and development and our skilled and talented people, so you receive outstanding windows that stand up to the harshest weather.

1 WINDOW TYPES

CASEMENT

Our best performing windows against snow, wind and rain.

Designed to keep harsh weather out, our casement windows are energy efficient, reliable and practical. They open out to a full 90 degrees via dual or single-arm crank operators and are hinged at the side, making them a great choice for the main and upper levels of your home.

AVAILABLE IN THE FOLLOWING FAMILIES:
Supreme | Heritage & Estate | Select

EXTERIOR

INTERIOR

EXTERIOR

INTERIOR

AWNING

An outstanding choice when air circulation and ease of use are paramount.

Our awning windows are hinged at the side and swing out from the bottom, providing excellent ventilation even during light rain. They're easy to use

and built to withstand harsh weather. Pair awning windows with larger fixed windows on the main and upper floors of your home to enjoy both the view and air flow.

Casement and Awning windows look and perform the same.

AVAILABLE IN THE FOLLOWING FAMILIES:

Supreme | Heritage & Estate | Select

1 WINDOW TYPES

SINGLE HUNG

Our single hung windows are easy to clean and take up no additional space when open.

The bottom sash slides up to open, stays in place, and tilts in for quick and easy cleaning. Since our single hung windows do not open outward, they're a great choice for rooms that face decks, porches and walkways. Enjoy reduced energy costs with our improved version of this classic window design.

AVAILABLE IN THE FOLLOWING FAMILIES:
Supreme | Select

EXTERIOR

INTERIOR

DOUBLE HUNG

Choose our double hung windows when ease of cleaning and air flow are your top priorities.

The top and bottom sashes slide up and down and stay in position, providing increased air flow into your home. Both sashes also tilt in for quick and easy cleaning of the entire window. And because our double hung windows do not open outward, they're an excellent choice for rooms that face decks, porches and walkways.

EXTERIOR

INTERIOR

SINGLE & DOUBLE GLIDER

Our glider windows are easy to use and easy to clean.

One sash slides side to side in our single glider, while our double glider allows both sashes to operate independently and easily for increased ventilation. Both options have sashes that tilt in and lift out of the frame for easy cleaning. Glider windows are often found in basements, but are an outstanding choice for any room in your home.

AVAILABLE IN THE FOLLOWING FAMILIES:

Supreme (Single & Double Glider)
Select (Single Glider only)

TILT & TURN

Our innovative tilt & turn windows offer unmatched versatility.

Enjoy the best features of casement, fixed and tilting designs with our elegant and simple tilt & turn windows. They tilt inward from the top for draft-free ventilation even during rain or, with a simple turn of the handle, open inward just like a door for maximum ventilation and easy cleaning. When closed, our tilt & turn windows appear just as elegant as our fixed windows. They're a fantastic choice for any room in the main and upper levels of your home.

AVAILABLE IN THE FOLLOWING FAMILIES:

1 WINDOW TYPES

FIXED/PICTURE (NON-OPERATING)

Add visual appeal to your home and let in more natural light with our fixed windows.

Fixed windows do not open or operate in any way. Instead, they can dramatically improve the appearance of any room in your home, especially when paired with larger, functional windows or installed around doors. Fixed windows also allow you to explore unique shapes and sizes, providing nearly unlimited possibilities. Available with or without sash.

AVAILABLE IN THE FOLLOWING FAMILIES:

HERITAGE & ESTATE WINDOW STYLE

Our heritage and estate windows blend the natural beauty of wood with the rugged durability of vinyl.

Enjoy the warmth of Eastern Canadian pine on the inside and the virtually maintenance-free durability of vinyl on the outside with our heritage and estate windows. And for a more traditional look on the inside of your home, choose our estate double hung window. When achieving a classic and timeless appearance for your windows is top of mind, look no further than our heritage and estate windows.

HERITAGE & ESTATE AVAILABLE IN:
Casement | Awning | Double Hung

2 WINDOW PERFORMANCE

We're constantly investing in new technologies, materials and techniques to provide you with the highest performing windows on the market – windows that reduce your energy costs, keep out the weather and make your home more comfortable.

STYLE PERFORMANCE ↑

- Tilt & Turn
- Casement
- Awning
- Single Hung
- Double Hung
- Single Glider
- Double Glider

There are two main considerations when determining the performance of your windows: weather performance and energy performance.

WEATHER PERFORMANCE

The elevation, exposure and terrain surrounding your home all impact the weather performance requirements of your windows. These requirements also vary with the climate and location of your home.

We've built our own test lab in our manufacturing facility to ensure your windows meet or exceed the requirements in your location. Look for the North American Fenestration Standard (NAFS) label on your windows for details on how they meet or surpass your requirements.

Talk to your local, authorized Kohltech dealer to ensure your windows meet and exceed weather performance standards.

ENERGY PERFORMANCE

All our windows are designed with energy performance in mind. Choosing Kohltech windows is an investment in the energy efficiency of your home, as most of our products meet or exceed the more stringent requirements of the ENERGY STAR® program.

Our windows incorporate a number of additional features that increase their energy performance:

INSULATED GLAZED UNIT

Made up of two or three glass panes separated by chambers of air or an inert gas (argon or krypton). This results in decreased heat transfer compared to single-pane units.

LOW EMISSIVITY (LOE) COATING

A thin, virtually invisible metallic layer, applied to the glass, that reflects heat back to the same side it originated from. This increases your home's ability to retain heat.

WARM EDGE SPACER SYSTEM

Raises the temperature of glass near the frame, decreasing heat loss. Also functions to remove any moisture between the panes of glass. We offer three types of spacers: Intercept®, Ultra® and SuperSpacer®.

2 WINDOW PERFORMANCE

HIGH
PERFORMANCE
GLASS

We offer a wide variety of high performance glass options that will help increase your home's energy efficiency:

LOE ARGON

Saves on energy. Increased energy performance by combining a LoE coating, argon gas and an intercept warm edge spacer.

ENERGLAS®

The standard in glass performance. Our most popular option dramatically reduces heat loss and infiltration of harmful UV rays. It uses a high performance ultra warm edge spacer, one panel of LoE coated glass and one cavity filled with argon gas.

ENERGLAS PLUS®

The ultimate in high performance and energy efficiency. Our ultra high performance, energy efficient, triple glazed option uses warm edge SuperSpacers, two panels of LoE coated glass and two cavities filled with argon or krypton gas.

LOW SOLAR GAIN (LSG) GLASS

For hot summers and cold winters. If you get a lot of sun in the summer, consider using LSG glass. It significantly reduces heat transfer, preventing overheating in the summer and providing insulation in the winter for year-round comfort.

HIGH SOLAR GAIN (HSG) GLASS

HSG glass excels at allowing heat from the sun in, helping to heat homes in colder climates and reduce energy costs. HSG is our standard LoE.

SPECIAL GLASS OPTIONS

Take your windows to the next level with these additional glass options.

TEMPERED

Tempered glass is a safe alternative to regular glass. The glass undergoes a heat treatment to increase its strength and improve its safety.

SOUND-REDUCING LAMINATED

A type of safety glass that reduces outdoor noise by up to 50%. The glass is held together by an interlayer to improve its safety.

ARCHITECTURAL GLASS

We offer a wide variety of glass options to fit projects of any size and makeup. Unique offerings include specialty privacy glass, float glass, solar control glass and safety glass.

ENTRANCE & LIFESTYLE DOORS

A DOOR FOR EVERY LIFESTYLE

Our entrance and patio doors are crafted to add lasting beauty to your home, while providing the security, choice and performance you need.

Entrance doors are made to order with distinctive glass kits, sidelites, transoms, ellipses and half-rounds – all designed to enhance the character of your home. A variety of patio doors, terrace doors and garden doors are also available.

For detailed information about all our door options, download our door brochure at kohltech.com or pick one up at your local Kohltech dealer.

A photograph of two men standing side-by-side. The man on the left is older, has a mustache, and is wearing glasses and a light blue button-down shirt. He is standing in front of a yellow door. The man on the right is younger, wearing glasses and a light blue checkered button-down shirt. He is standing in front of a red door with a window. A large blue diagonal graphic is overlaid on the left side of the image.
