

BYPASS PRUNING SHEARS

Professional-grade heavy-duty pruning shears from Jameson are designed and built with the user in mind. Highest quality materials and workmanship provide precise cuts, ease of use, and long-lasting cutting performance.

- Ultra-sharp precision hardened bypass-style cutting blade for healthy pruning of live growth.
- Non-stick coating provides smooth reduce effort cutting action and improved rust-resistance.
- Durable aluminum frame with cushion-grip over-molding provides improved comfort, user control, and rugged long-lasting tool life.
- Ergonomic contoured grip design sized for medium & large hands, with optimized cutting blade angle for reduced hand fatigue.
- Easy squeeze-to-open blade lock protects cutting blade during transport or storage while allowing fast convenient one-hand unlocking.
