TM Series® Electronic Water Flowmeters

3 INCH & 4 INCH METER SIZES
[TM30XXXXXX - TM40XXXXXX MODELS]
Please save these instructions for future reference. Read carefully before attempting to assemble, install, operate or maintain the product described.

Protect yourself and others by observing all safety information. Failure to comply with instructions could result in personal injury and/or property damage.

Please refer to back cover for information regarding this product’s warranty and other important information.

DO NOT RETURN THIS PRODUCT TO THE STORE!

Please contact Great Plains Industries, Inc.® before returning any product. If you are missing parts, or experience problems with your installation, contact our Customer Support Department. We will be happy to assist you.

Call: 888-996-3837 or 316-686-7361

Email: meters@gplains.com

BEFORE YOU BEGIN

Usage Requirements

• Use TM Series meters with water and other chemicals compatible with wetted components.
• **DO NOT** use to meter fuel or incompatible chemicals.
• TM Series meters are very sensitive to electric noise if operated within 1 to 2 inches of some electric motors or other sources of electronic noise.
• This meter is not legal for trade applications.

UNPACKING/INSPECTION

Inspect

• After unpacking the unit, inspect carefully for any damage that may have occurred during transit. Check for loose, missing or damaged parts. Shipping damage claims must be filed with carrier.
• See General Safety Instructions, and all Cautions, Warnings, and Dangers as shown.
GENERAL SAFETY INSTRUCTIONS

IMPORTANT: It is your responsibility to:

- Ensure that all equipment operators have access to adequate instructions concerning safe operating and maintenance procedures.

**WARNING** Compatibility of this product’s material and the process fluid and/or environment should be considered prior to putting into service.

**WARNING** Product should never be operated outside its published specifications for temperature or pressure. See specifications for your model.

**WARNING** Make sure flow and pressure have been eliminated from process pipe prior to installing or removing product.

**WARNING** Always use appropriate thread sealant or flange gaskets when connecting product to process piping.

**CAUTION** To protect against leakage, seal all pipe threads with an appropriate sealing compound. Make sure the sealing compound does not intrude into the flow path.

**NOTE:** If connecting to new male pipe threads, burrs and curls can adversely affect accuracy. Correct the problem prior to turbine installation.

**NOTE:** Do not over tighten the flange bolts. This may cause the gasket to be compressed into the flow stream and may decrease the accuracy of the meter.

**CAUTION** Installation near high electromagnetic fields and high current fields is not recommended and may result in inaccurate readings.

</table>

Length guidelines are estimates; actual length can vary up to ± ½ in. (13 mm).

Output modules add 0.90 in. (23 mm) to height.

Figure 1

Height (B) is to top-of-flange for flanged models; top of display for non-flanged models.
INSTALLATION

**IMPORTANT:** TM Series meters are available with either a computer for local electronic display, or three versions of output modules (see **PARTS** section of this manual) to provide a digital signal to customer interfacing equipment. TM Series meters with computer display ship pre-configured from the factory in either gallons or liters. The volume unit can be changed to several other options. Refer to the Q9 owner’s manual for details on changing or customizing the volume unit.

**Connections**

Install your meter in-line either horizontally or vertically. Installation to metal connections is not recommended. Install as follows:

1. Plan to install turbine with a minimum straight pipe length as follows (see Figure 2):
   - Upstream from the turbine, allow a minimum straight pipe length of 10 times the internal diameter of the turbine.
   - Downstream from the turbine, allow a minimum straight pipe length of 5 times the internal diameter of the turbine.

2. For Spigot (Pipe) End use only primer and solvents approved for PVC gluing.
   - Cut to Length The meter housing can be shortened by the customer. Each meter has a “dotted” line feature molded on the top surface of the housing tube. The housing can be cut up to this line without harming any internals. Most glue on fittings will fit without interfering with the computer display area. However, the customer should check all parts before attempting cut.
   - For NPT and BSP Fittings wrap all connections with 3 to 4 wraps of thread tape (optional to use pipe thread sealant). Make sure the tape does not intrude into the flow path.

3. Attach meter with arrow pointed in the direction of fluid flow.

4. For NPT Fittings - Hand tighten the meter at the housing ends. Do not use a wrench or similar tool to tighten. This can damage the housing.

![Figure 2](image-url)
Connections (continued)

5. For ANSI or DIN Flange Fittings - Customer to provide:

- Ring Gaskets or Full-Face Gaskets approved for use with type flange installed (ANSI or DIN) and the fluid being monitored (2 required).
- 5/8-inch bolts and nuts for ANSI flanges. Four per side for 3-inch meters; eight per side for 4-inch meters.
- 16 mm bolts and nuts for DIN flanges. Eight per side for 3-inch and 4-inch meters.
- Torque bolts using a star pattern to 25 ft-lbs (33.8 N·m). Supplied flanges are two-piece Van Stone style and allow the meter to be oriented regardless of the mating flanges position.

For best results, always verify accuracy before use.

⚠️ CAUTION

*Blowing compressed air through the turbine assembly could damage the rotor.*

⚠️ CAUTION

*Do not allow liquids to dry inside the turbine.*

⚠️ CAUTION

*Handle the rotor carefully. Small scratches or nicks can affect accuracy.*
OPERATION / CALIBRATION

Verify Meter Accuracy

Before using, check the meter’s accuracy and verify calibration.

1. Make sure there is no air in the system by starting the flow until it runs steadily. Then, stop or divert the flow using a valve or nozzle.

2. Meter an exact known volume into an accurate container. For best results, meter with one continuous full stream.

3. Check the volume against the display or recording equipment. If the amount metered is accurate, further calibration is not necessary. If not, refer to the Q9 Owner’s Manual (Non-Agency) Field Calibration Section for further instructions (see below).

NOTE: Make sure you meet the meter’s minimum flowrate requirements:

<table>
<thead>
<tr>
<th>TM Series Meter Minimum Flowrate</th>
</tr>
</thead>
<tbody>
<tr>
<td>TM30 - 3 inch</td>
</tr>
<tr>
<td>TM40 - 4 inch</td>
</tr>
</tbody>
</table>

You can download the Q9 Owner’s Manual (Non-Agency) here:

[QR Code]

or visit FLOMECmeters.com to download owner’s manuals and other technical documents.
**NOTE:** Proper handling and care will extend the life and service of the meter

### Turbine Rotor

The meter is virtually maintenance-free. However, it is important the rotor moves freely. Keep the meter clean and free of contaminants.

The rotor can be removed for cleaning and inspection. Begin by unscrewing the nose cone from the outlet end of the meter. A 1/4” square socket extension can be used. Remove the lock and flat thrust washers. Rotor can then be removed from shaft. Note orientation because rotor is not bi-directional. Remove debris or deposits using soft brush or small probe. Reassemble in reverse order.

⚠️ **CAUTION**

*Blowing compressed air through the turbine assembly could damage the rotor.*

⚠️ **CAUTION**

*Do not allow liquids to dry inside the turbine.*

⚠️ **CAUTION**

*Handle the rotor carefully. Small scratches or nicks can affect accuracy.*
PARTS & SERVICE

For warranty consideration, parts, or other service information, please contact your local distributor. If you need further assistance, contact the GPI Product Support Department in Wichita, Kansas, during normal business hours.

A toll free number is provided for your convenience.

1-888-996-3837

To obtain prompt, efficient service, always be prepared with the following information:

• The model number of your meter.
• The serial number or manufacturing date code of your meter.
• Part descriptions and numbers.

For warranty work, always be prepared with your original sales slip or other evidence of purchase date.

IMPORTANT: Please contact GPI before returning any parts. It may be possible to diagnose the trouble and identify needed parts in a telephone call.

Do not return this product without prior approval from the GPI Product Support Department. Due to strict government regulations, GPI cannot accept parts unless they have been drained and cleaned.

WEEE DIRECTIVE

The Waste Electrical and Electronic Equipment (WEEE) directive (2002/96/EC) was approved by the European Parliament and the Council of the European Union in 2003. This symbol indicates that this product contains electrical and electronic equipment that may include batteries, printed circuit boards, liquid crystal displays or other components that may be subject to local disposal regulations at your location. Please understand those regulations and dispose of this product in a responsible manner.

ROHS COMPLIANT (2011/65/EU)

This product is in compliance with the RoHS Directive of the European Parliament and of the Council on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment.

Environmental Rating: IP65
**FLOMEC® TWO-YEAR LIMITED WARRANTY**

Great Plains Industries, Inc. 5252 E. 36th Street North, Wichita, KS USA 67220-3205, hereby provides a limited warranty against defects in material and workmanship on all products manufactured by Great Plains Industries, Inc. This product includes a 2 year warranty. Manufacturer’s sole obligation under the foregoing warranties will be limited to either, at Manufacturer’s option, replacing or repairing defective Goods (subject to limitations hereinafter provided) or refunding the purchase price for such Goods theretofore paid by the Buyer, and Buyer’s exclusive remedy for breach of any such warranties will be enforcement of such obligations of Manufacturer. The warranty shall extend to the purchaser of this product and to any person to whom such product is transferred during the warranty period.

The warranty period shall begin on the date of manufacture or on the date of purchase with an original sales receipt. This warranty shall not apply if:

A. the product has been altered or modified outside the warrantor’s duly appointed representative;

B. the product has been subjected to neglect, misuse, abuse or damage or has been installed or operated other than in accordance with the manufacturer’s operating instructions.

To make a claim against this warranty, contact the GPI Customer Service Department at 316-686-7361 or 888-996-3837.

Or by mail at:
Great Plains Industries, Inc.
5252 E. 36th St. North
Wichita, KS, USA 67220-3205

The company will step you through a product troubleshooting process to determine appropriate corrective actions.

GREAT PLAINS INDUSTRIES, INC., EXCLUDES LIABILITY UNDER THIS WARRANTY FOR DIRECT, INDIRECT, INCIDENTAL AND CONSEQUENTIAL DAMAGES INCURRED IN THE USE OR LOSS OF USE OF THE PRODUCT WARRANTED HERUNDER.

The company herewith expressly disclaims any warranty of merchantability or fitness for any particular purpose other than for which it was designed.

This warranty gives you specific rights and you may also have other rights which vary from U.S. state to U.S. state.

Note: In compliance with MAGNUSON MOSS CONSUMER WARRANTY ACT – Part 702 (governs the resale availability of the warranty terms).
