

LARGE TANKS MADE EASY

ENGINE-DRIVEN PUMPS

FUELING ON YOUR TERMS

Western Global engine-driven pump kits are designed in-house and built to meet high-demand fuel applications. With ease of operation, quick deployment, and serviceability, these kits allow for continued operations in areas that need high flow rates but lack on-site power.

PUMP KIT PACKAGES

ENGINE DRIVEN PUMP KIT (50 GPM)

Features 2" pump with Honda engine and recoil starter. Sold factory fitted on skid for external use on E-Series, or inside P-Series tanks.

Ideal for remote construction/mining sites and disaster relief efforts.

Kit Includes: Dual Head 30 Micron Filter, 50' Fueling hose (1.5" dia.) on spring retractable HANNAY hose reel, Macnaught digital meter, swivel, & 1.5" hi-flow nozzle.

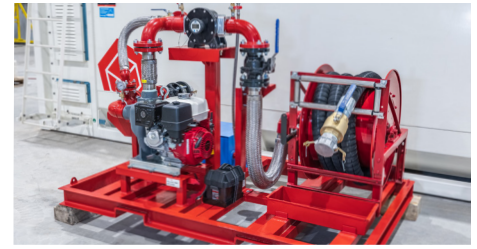

ENGINE DRIVEN PUMP KIT (120 GPM)

Features 3" pump with Honda engine and electric starter. Sold factory fitted on skid for external use on E-Series, or inside P-Series tanks.

Ideal for remote construction/mining sites, fueling anything from lube trucks to large earth moving equipment and providing aid in disaster relief efforts.

Kit Includes: Hi-Flow Filter (30 Micron), 30' x 2" dispense hose on manual crank rewind HANNAY hose reel, Macnaught digital meter, and 2" camlock coupling at end of hose.

ENGINE DRIVEN PUMP KIT (200 GPM)

Features 3" pump with Honda engine and electric starter. Mounted on open frame skid external to tank cabinet. Suction side includes 20' x 3" loose connection hose to join to E-Series or P-Series tanks.

Ideal for various sites that require bulk loading fuel transport vehicles, lube trucks and mining equipment.

Kit Includes: 25" x 3" Fuel transfer hose on manual crank rewind HANNAY hose reel, in-line Y-strainer, Macnaught digital meter, & 3" camlock coupling at end.
