FTGPRV034 pressure only safety relief valve is designed specifically for the protection of hot water supply systems where over-pressure conditions are likely to occur as a result of thermal expansion. The valve automatically reseats after pressure relief. May be installed directly on the tank or in a tee and is appropriate for either side (hot or cold) of water heater.

Features

- Compact and economical
- Forged Brass body
- Brass & Stainless Steel Internal Parts
- Performance tested
- Lead free
