

LED Lamp Wall Sconce

EW2216
INSTALLATION SHEET

START FROM HERE

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all time during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:

- This Kuzco LED fixtures come with pre-wired LED module(s)
- Unless instructed, Do Not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage
- Use ELV (Electronic Low Voltage) type of dimmer for dimming application

1. Remove the fixture from its original packaging. First remove the set screws **(2c)** from the upper and lower side of the lamp cover **(2d)** using the allen key provided.
2. Attach all wiring **(1b)** with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Attach the mounting plate **(1c)** to the electrical junction box **(1a)** using the screws **(1d)** provided in the hardware package.
3. Next, drill pilot holes into the plywood or wall studs. Mount the canopy **(2a)** and finish with anchor screws **(2b)**. Next, place the fixture **(2d)** over the canopy **(2a)** and secure with four set screws **(2c)** upper and lower side of the fixture cover **(2d)** using the allen key.
4. To prevent moisture form entering the outlet box and causing a short, seal around the top and side perimeter between the fixture and the wall surface with weather resistant caulking **(see illustration a)**. The space at the bottom should be left un-caulked to prevent moisture build-up. Apply a small amount of weather resistant caulking around the side perimeter between the lamp and mounting plate.
5. You have now completed the installation of your fixture, enjoy.
