**We can Help,
Know your Options.**

Women who have an abortion

- Are 3x more likely to commit suicide. (1)
- Have an 81% increased risk of mental health problems. (1)
- Have a 70% higher rate of deliberate self harm than women who give birth. (1)
- Have a 110% increased risk of alcohol abuse. (1)

Teenagers who have an abortion

- Are up to 10x more likely to attempt suicide than their counterparts who have not had an abortion. (1)
- Risk of breast cancer increases by 30% among women who chose abortion after giving birth once. (2)
- Risk of breast cancer increases by 50% for women who chose abortion before giving birth. (2)
- 64% of women who have an abortion report feeling coerced or forced into the decision.
If you are being coerced call the Center Against Forced Abortions at (210)614-7157. (3)

Fetal Development

Human **three**
weeks after
fertilization

Human **six**
weeks after
fertilization

Human **eight**
weeks after
fertilization

Human **eighteen**
weeks after
fertilization

- A human's heart starts beating 18 to 21 days after conception. (4)
- Babies have brainwaves 6 weeks after conception. (4)
- By 18 weeks after conception your baby can hear. (5)
- During an abortion, the cervix is forcibly dilated and subjected to injury, and this damage to the cervix may cause a woman to later have a premature delivery. (6)
