Unborn babies are human beings and can feel pain

Your Baby’s Development:
- **3 weeks from conception** – heart is beating
- **6 weeks** – brain waves can be measured, baby responds to touch
- **8 weeks** – all organ systems are present
- **9 weeks** – baby can yawn and suck
- **10 weeks** – baby has unique fingerprints
- **12 weeks** – all organ systems are functioning, baby can smile

Love is not happy with evil, but is happy with the truth.
1 Corinthians 13:6-7

Unborn babies are human beings and can feel pain

Look at your ultrasound...

We’re here for you...

“A person’s a person, no matter how small.”
~ Dr. Seuss

If you are in an abortion center right now, you can just leave. You don’t have to tell anyone inside. If you have already paid for the abortion, we can help you get that money back.

We understand that this is a difficult situation and we want to help you.

Please come outside and talk with us, call 1-800-712-4357 or call the number below.

...you are not alone
Possible Emotional and Spiritual Consequences of Abortion

“I, too, was just like you – frightened, panicked and feeling all alone. Despite their claims, you know in your heart that what is growing inside you is your baby. Don’t make the same mistake I made by letting today’s temporary circumstances force you into a decision to kill your child, a decision that you will eventually regret. Abortion was not the answer. It was a cruel and permanent harm to my child, and it left me with shame, anger, self-hatred and hopelessness. Today you have help I never had. Listen to the real friend who gave you this brochure.”

Denise Walker

Physical Risks with Abortion

- intense pain
- infertility
- problems with future pregnancies
- breast cancer
- death

Having your baby is safer than having an abortion. See documentation at www.afterabortion.org & www.abortionprocedures.com

Your unborn child is an unexpected treasure that God has entrusted to you...

He or she needs your care right now. Don’t let the abortionist harm your baby.

Choose Life – Choose Love!

You have the right to have your baby.

Don’t let anyone deprive you of the love of your son or daughter. When you are holding your baby in your arms, you will know you did the right thing. You will feel proud that you endured a tough situation and gave your child life!

(If you would like to talk about adoption, we can help.)

These children are alive today because their parents changed their minds about abortion!

They have kept their babies instead!

The Abortion Pill (“Medication Abortion”)

Even if you’ve already taken the first drug (mifepristone), it may not be too late! Hundreds of babies have survived the first drug and have been born perfectly healthy. Don’t take the second drug (misoprostol)! Instead, call this 24-hour nurse hotline right away for help in saving your baby: 1-877-558-0333 www.abortionpillreversal.com

Second or Third Trimester Abortion

No matter what the abortion center tells you, laminaria dilators CAN be safely removed by a competent doctor, allowing your pregnancy to continue normally. Even if you’ve received an injection to kill your baby or you’ve taken medication to help open your cervix, your baby may still be alive! Let us direct you to a doctor who can help!

“Removing those laminaria dilators was one of the most important choices I have ever made in my life, and five months later a beautiful baby girl was born to me. Serena is such a joy in my life and I thank God for blessing me with her. Each and every day Serena continues to be the example to our friends and family members of how precious life really is.”

– Mai Lee Yang

Kameryn survived the abortion pill and was born perfectly healthy!
