

FREE PREGNANCY TEST

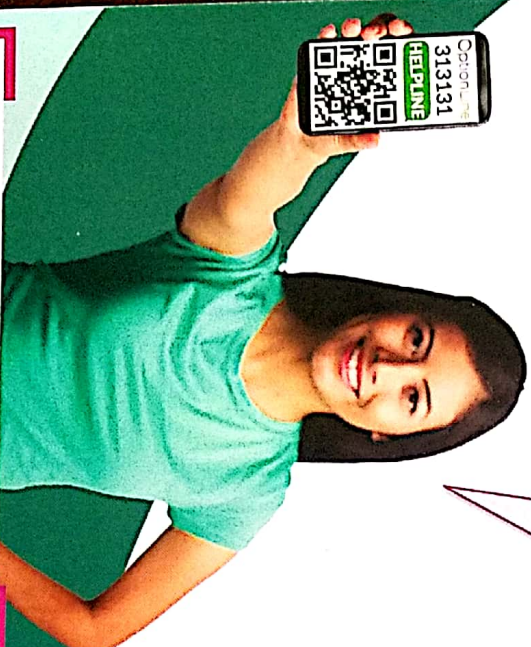

i Pregnancy tests detect a hormone produced right after a fertilized egg attaches to the wall of a woman's uterus.¹

! If blood, protein, or certain medications or drugs are present in your urine, sometimes a pregnancy test can give a **false-positive**.¹

✓ After a home pregnancy test, you can confirm your results for **free** at a Pregnancy Help Center with even more accurate testing.

\$ Reproductive clinics charge anywhere from **\$20 or more** just for a pregnancy test. Do your research and **ask for prices first!**

You can get the same quality pregnancy test **plus ultrasound verification FREE** from local Pregnancy Help Centers!

A message from NewWaveFeminists.com to women considering abortion:

A lot of people are probably telling you what you **can't** do right now. We're here to tell you what you **CAN** do. **You've got this.** You can have this child and finish school. You can stay pregnant and still be successful. **You are strong enough** to do this all on your own if need be, because you are a rockstar, my friend. You have an amazing opportunity in front of you right now. You have the chance to be **someone's hero**. You have the chance to save someone's life. **YOU ARE STRONG.** You don't need an abortion. And we're not going to show you some sad picture of some sad-looking girl crying and gazing out a rainy window... because that is **NOT** you. You're in **#beastmode**. Unplanned things happen, and you know what you do? You handle it like a boss. Bravery doesn't mean you aren't scared. It means you **ARE** scared, but you **choose** not to give into that fear. There's a new life inside of you right now. And you are the only one who can save her. **You can do this.** And we are here to help, like sidekicks. **You be a hero.** Save your child's life.

CONNECTION

"Your connection to FREE confidential pregnancy help."

FREE ULTRASOUND

As many as **one in four pregnancies** result in a completely natural miscarriage, often very early and unknown,² but pregnancy tests can still test positive up to **five weeks later**.³ A free ultrasound will quickly confirm if you are still actually pregnant.

Local **non-profit** pregnancy centers together help **dozens of women every week** with pregnancy tests, ultrasound verification, and many other services and ongoing assistance **completely free of charge**.

Profit-driven reproductive clinics, however, charge up to \$20 or more for a pregnancy test, and then **another \$75 - 500 or more** just for an ultrasound!

Occasionally, they may charge for an abortion even when there is no viable pregnancy, so **always ask to see your ultrasound!**

Positive pregnancy test?
You might not be pregnant!

Up to **25%** of positive pregnancy tests may **not** be a viable pregnancy.

Without **free** ultrasound verification at a **non-profit** center, you may be wasting money at a **for-profit** clinic!

FREE STI TESTING

STIs (or "STDs") are infections passed from one person to another during sexual activity.

The Center for Disease Control and Prevention estimates **50% of sexually active people** will contract a STI by the age of 25, but up to **90% are not aware they have an infection**.⁴

Condoms only **slightly** reduce the risk of STIs, which spread by skin to skin contact.⁵ Many people **do not experience any symptoms** so you won't know if you have an STI without a test.⁶ This is important, **especially before an abortion**.

An abortion can push an infection further into the uterus,⁷ leading to a pelvic infection, which is the most common complication of abortion.^{8,9}

Women who have abortions are more likely to develop **Pelvic Inflammatory Disease**,^{8,10} increasing risks of ectopic pregnancy, infertility, abscess, chronic pelvic/abdominal pain, and pain & bleeding during sex.¹¹

At most reproductive clinics, STI testing is **not** a routine procedure prior to abortion.¹² If it is offered, the clinic will charge you **even more fees** for this simple testing.

Before seeking an abortion, it is very important to have a **FREE** STI test from a Pregnancy Help Center.

This brochure has been researched and reviewed by physicians for medical accuracy. However, it is not intended to constitute medical advice or replace the individualized counsel of medical professionals.
