

Planned Parenthood Fact Sheet

Compiled by Holy Family Davidsonville Respect Life, Sept 6, 2021

- Planned Parenthood (PP) performed 354,871 abortions in FY2019 (between Oct. 1, 2018 and Sept. 30, 2019) which is a 15-year high **[1]** even as the overall number of abortions has continued to decline in the U.S. from 1.29 million in 2001 to 862,320 in 2017. **[2]**
- 96.9% of pregnant PP clients get abortions. In FY2019, PP committed more than 133 abortions for every one adoption referral. **[3]**
- PP had 2.4 million unique customers. That means nearly one out of every six women (15%) who walked into a PP ended up getting an abortion. **[4]**
- Since 2003, PP has gone from committing 20% of all abortions in the United States to 40%. **[3]**
- PP's taxpayer funding increased to \$618.1 MILLION in FY20 which accounts for 38% of their income and is a new record of government support. **[4]**
- Since the first states legalized abortion in 1967, PP has committed about 8,965,000 abortions in the U.S. This is roughly equivalent to the entire populations of New Jersey or Virginia. **[3]**
- The PP's famous "Only three or four percent of what we do is abortions" has been widely debunked because PP unbundles its services to create a lopsided view of what they do. They count the services that are performed in the course of performing an abortion (e.g., pregnancy test, STI test, ultrasound, prescription) as "discreet clinical interactions" separate from an abortion so that a woman's actual abortion (the purpose of here visit) may only account for 16% of the services she receives. **[7]**
- PP has 20 different social media accounts used to target different audiences. This includes accounts with messaging specifically geared toward black and Latino communities. As an outcome of social media influence, black women account for the largest percentage (38%) of abortions in the United States, yet only 13 percent of the total U.S. population is black. **[4]**
- Each year, PP and its political arm – the PP Action Fund – work to overturn pro-life bills introduced at state levels. Their report notes they currently have "three dozen open cases challenging laws, policies, or government actions" on abortion. These cases include blocking Georgia and Tennessee's six-week abortion bans. **[5]**
- PP says that it provides comprehensive, honest, fact-based sex education to 1.1 million people annually. This education includes the allegations that homosexuality and transgenderism are healthy lifestyles, and that abortion has a much lower complication rate than childbirth. **[3]**
- The PP Federation of America is one of 134 member associations of the gigantic International PP Federation (IPPF), which works in 142 nations on every continent. It joins two other multinational non-governmental organizations that do the most damage to faith, life and family in the world — the United Nations Population Fund (UNFPA), the architect and supporter of the Chinese forced abortion program, and the Population Council, founded and supported by eugenicists, now serving as the guiding hand behind population suppression efforts all over the world. **[3]**
- PP is one of the largest sources in the U.S. of transgender healthcare and is offering its the irreversible body-altering drugs to minors with parental consent. Until the last few years, gender dysphoria was understood to be a psychological disorder, and very treatable with 75 percent and 95 percent of children who experience it outgrowing it as adults. **[6]**
