MacroBin® 33 Series

33-FV The MacroBin 33-FV is designed with four-way entry for easier cross-stacking in the last rows of your CA room.

With a bin capacity of 52,000 cubic inches, the MacroBin 33-FV can increase storage capacity up to 14% in CA rooms. Once emptied, the MacroBin 33-FV lets you nest three bins in the space of two which reduces freight and storage fees when handling empty bins.

Feature Highlights

- **Impact-grade plastic** lasts longer, standing up to heavy day-to-day use, season after season. The molded plastic resists splintering, reducing damage to product and maintenance costs. Bin repair is inexpensive with hot air welding.
- **Ventilation slots** facilitate the use of thermofogging, reduce heat absorption and cooling costs, and provide for quicker drying and degreening.
- **Lightweight construction** reduces shipping costs and makes MacroBins easier to move; their interlocking foot design makes them safer to stack — up to 9 high.*
- **FDA-approved materials** are certified safe for use with food products, eliminating many HACCP problems associated with wood bins.
- **Nonporous surfaces** won't absorb water or dehydrate your product like wood bins, and they provide a constant tare weight throughout their use.
- **Rounded corners and smooth surfaces** mean fewer scuffs, abrasions, and cuts on your product. Risk of contamination is reduced because there are fewer places for unwanted particles to hide.
- **Easy-to-sanitize** MacroBins keep cleaning costs to a minimum. A high-pressure wash removes most debris; a nonabrasive brush can dislodge any remaining items.

*See reverse for maximum stack weight specifications.
