MacroBin® 48 Series

48-FV The MacroBin 48-FV has a capacity of 94,000 cubic inches and holds up to 3,000 pounds.

The MacroBin 48-FV is the world's largest fully-vented, fixed-wall, injection-molded bin, replacing 4x4 foot metal, corrugated, or wood containers. With superior ventilation, this large bin is ideal for storing nuts, garlic, prunes, potatoes, or other commodities that need a moisture-free environment.

Feature Highlights

- **Easy-to-sanitize** MacroBins keep cleaning costs to a minimum. A high-pressure wash removes most debris; a nonabrasive brush can dislodge any remaining items.
- **Splinter-resistant plastic** eliminates contamination problems associated with wood chunks, paint chips, or metal fragments. Bin repair is inexpensive with hot air welding.
- **Nonporous surfaces** won't absorb water or dehydrate your product like wood bins, and they provide a constant tare weight throughout their use.
- **FDA-approved materials** are certified safe for use with food products, eliminating many HACCP problems associated with wood bins.
- **Injection-molded, high impact resistant plastic** stands up to heavy day-to-day use. The one-piece design eliminates the problem of product getting trapped between the side walls and base.
- **Lightweight construction** reduces shipping costs and makes MacroBins easier to move; their direct-load corner and center posts make them safer to stack — up to 5 high.*
- **Rounded corners and smooth surfaces** mean less damage to your product. The need for expensive sleeves or liners may be eliminated.
- **Secure-fitting MacroLids®** provide additional coverage and further reduce the risk of contamination from foreign particles.

*See reverse for maximum stack weight specifications.
