Aluminum Safety Cleats

Part #	Description	Size (in)	Weight (lbs)
SFTC-6	Gray Aluminum Safety Cleat	6	0.5
SFTC-6W	White Aluminum Safety Cleat	6	0.5
SFTC-6B	Black Aluminum Safety Cleat	6	0.5
SFTC-8	Gray Aluminum Safety Cleat	8	1
SFTC-8W	White Aluminum Safety Cleat	8	1
SFTC-8B	Black Aluminum Safety Cleat	8	1

Tired of stubbing your toe on cleats? These cleats lay down flat when not in use and are rounded on the edges. Made of Almag 35, a true marine grade aluminum, these cleats are extremely strong and corrosion-resistant. They can be bolted down from the top and use 3/8" fasteners.

Nylon Safety Cleats

Part #	Description	Size (in)	Weight (lbs)
B6001	Black Nylon Fold-Down Safety Cleat	6	1.5
W6000	White Nylon Fold-Down Safety Cleat	6	1.5
B9001	Black Nylon Fold-Down Safety Cleat	9	2
W9000	White Nylon Fold-Down Safety Cleat	9	2

Just like the aluminum models shown above, these cleats can lay down flat when not in use. Made of a nylon composite, they are strong and durable. With angled sides, they can even be driven over when folded down. Will not rust or corrode. Can bolt to existing boat docks or any other flat surface, such as truck beds, trailers, garages, and much more. They use 1/4" fasteners and are available in black or white.

Galvanized Steel Cleats

Part #	Description	Size (in)	Weight (lbs)
C-8	Galvanized Steel Cleat	8	2
C-10	Galvanized Steel Cleat	10	3
C-12	Galvanized Steel Cleat	12	4

These steel cleats are durable and long lasting, made from malleable iron and then hot-dipped galvanized. Use a hex head bolt and 3/8" fasteners to secure to your dock.

Tie Down Rings

Part #	Description	Size (in)
TDR LAG BOLT	Zinc plated machine bolt-lag style	6 x 1/2
TDR THRU BOLT	Zinc plated machine bolt-through style	6 x 1/2

A simple tie down method for your boat aside from standard cleats. Secure these bolts directly into your dock and then use the rings to loop your rope through.
