# Industrial Floats & pontoons

## Neptune Industrial Pipe Floats

These pipe floats are molded as one piece from tough, impact-resistant high density polyethylene and are foam filled. Their low profile float design provides stability and reduced resistant to waves, currents, and winds. They're able to withstand sub-zero temperatures and an added UV stabilizer provides excellent resistance to sunlight. The Pipe and Cable Floats include features like Clamp Tite™ that prevent pipeline slips, EzGlide™ which allows wind and water to easily pass, and Snap-N-Lock - the solution to many float transportation and storage woes.

Part #	Pipe Size (in)	Outside Diameter (in)	Inside Diameter (in)	Length (in)	Weight (lbs)	Capacity (lbs) @ 50% Submersion
PF6-160-R	6	24	6.5	30	49	83
PF8-200-R	8	24	8.5	30	55	167
PF10-250-R	10	24	10.6	30	68	212
PF12-300-R	12	24	12.6	44	75	235
PF14-350-R	14	24	14.4	44	98	269
PF16-400-R	16	45	16.5	44	146	765
