Rainwater Harvesting Filters

Rain Harvesting Leaf Eaters

Leaf Eaters offer the ultimate high performance economical choice of rain heads for heavy rainfall areas. Designed to filter out debris you can see and prevent them from entering a storage tank or clogging the drainage system, they are normally mounted on the wall below the gutter and just above the top height of your tank. A Flush Downpipe Diverter chamber is usually installed just below the Leaf Eater Filter as a secondary cleaning device that removes much of the finer debris that you can't easily see to ensure that only the cleanest water is entering your storage tank(s). These are the #1 choice for above ground rainwater filtering devices in the world, so you can be assured that you are choosing the ideal and best performing product for this application.

The Leaf Eater Advanced

- Compact, versatile rain head for quick and easy installation
- Patented single screen technology for advanced debris shedding (Cleanshield™)
- Minimal maintenance - the screen automatically sheds debris
- Pivot the outlet to suit vertical or horizontal (rear outlet) downpipes - variety of installation options in one product
- (VH Pivot™ patent pending)
- High flow rate performance and especially well suited to homes and buildings surrounded by trees and other debris sources
- Superior catchment efficiency at low and high flow rates
- Single screen with 0.955mm aperture mosquito proof stainless steel mesh
- Accommodates a 3" or 4" outlet
- Includes the new Clean Shield™ Screening technology and the versatile new VH Pivot outlet that fits all downspout installations
- Directs leaves & debris away from the flow of water
- Improves tank water quality
- Single screen assembly for easy removal and installation

if it flows,

The Leaf Eater Ultra

- The ultimate in innovation, design and performance
- This rain head is a combination of a modern, sleek design combined with the latest rain head technology
- Integrated cover and cap to compliment modern and classic architecture
- Leaf Eater Ultra™ uses the rainwater's force to deflect leaves and large debris off the screen (Hydro Activated Filtration™ technology)
- The Leaf Slide deflects debris away from the screen allowing for high flow rate performance
- Features a single mosquito proof stainless steel mesh screen with 1/32" aperture
- Minimal maintenance required, designed to clean automatically
- The outlet pivots to suit vertical or horizontal (rear outlet) downspouts (VH Pivot™)
- Maximizes the catchment efficiency at low and high flow rates
