

Students with High Functioning ASD

When: Wednesday, March 11th, 7:00 – 9:00 pm

Where: Curtis Middle School, 22 Pratts Mills Rd, Sudbury, MA 01776

Presented by: [Massachusetts Partnership for Youth](#)

This workshop reviews the unique needs of students with high functioning ASD:

Students identified with High Functioning ASD, formerly known as Asperger's Syndrome, present behaviors that require more subtle and relationship-oriented interventions compared to an ABA approach. This presentation reviews some of the challenges inherent in this diagnostic profile, including addressing the question as to what interventions are necessary. This presentation will review the social skills challenges that students encounter, with specifics addressing the needs of young students vs. adolescents.
