You are being provided with this pamphlet because you, a family member or friend is being taken by ambulance to the hospital.

Ambulance transport is being provided by the Sudbury Fire Department where Emergency Medical Technicians (EMTs) are on duty 24 hours per day. Often, paramedics are also summoned from an area hospital to respond to the scene or meet the ambulance enroute. The paramedics can conduct a more detailed patient evaluation, and if indicated, begin more aggressive treatment prior to arrival at the Emergency Room. This evaluation and treatment may take several minutes, and the delay should not be cause for added concern.

If you have been involved in an automobile accident, a local towing company will tow your vehicle. Telephone numbers for the Sudbury Police Department and local towing companies are provided on the back of the pamphlet.

The Sudbury Fire Department generally transports to three area hospitals. Directions and telephone numbers are included for your convenience.
