

Simply your business tasks. Viewpoint Financial Controls is Vista, on a mobile device, configured out of the box and ready to go. Achieve real-time collaboration between the accounting and operations teams, reduce manual processes and accelerate workflows without having to sync or deal with the hidden expense, hassle and data mapping issues that are common with connectors and third-party integrations.

ERPs are designed for the back office and not for the jobsite. With Viewpoint Financial Controls, project managers and operations staff can access AP Review, Purchasing and Job Billing data from Vista, in real time from virtually any mobile device.

Improved collaboration between teams located across the office, jobsite trailer and field speeds up workflow and removes layers of communication that were needed to keep teams aligned. A reduction in manual processes and the double handling or duplication of data reduces cost while providing ease of use, visibility and control, from anywhere, anytime.

BENEFITS

- Extend Vista to the web
- Simplify workflows
- Reduce manual processes
- Improve collaboration
- Accelerate processes
- Real-time data
- Increased Visibility
- Easy to use

CAPABILITIES

AP UNAPPROVED INVOICE REVIEW

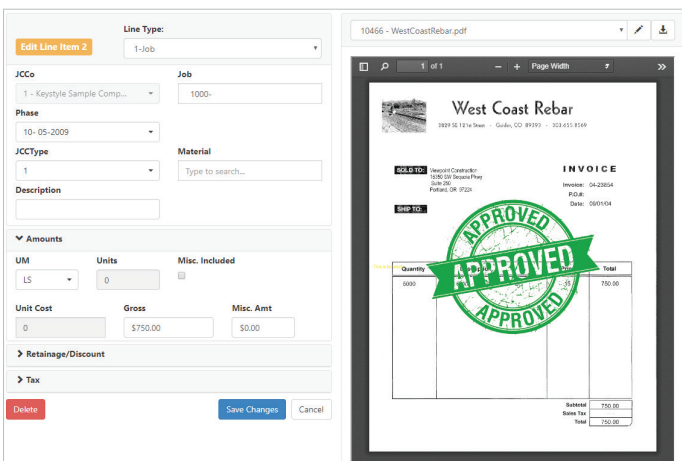

Simple, fast invoice review, comment and approval of assigned invoices from a mobile device in the field or on the go. Improve communication between accounting and operations and ensure invoice payment accuracy.

AP CHECK REVIEW

Go paperless and save time by eliminating manual invoice and check collation for weekly check signings. View batched and processed check images and invoices together in a single screen by range to decide on which to pay and which to hold.

PURCHASE ORDER DASHBOARD

Gain visibility by switching from relying on reporting to managing the entire PO process in a dashboard. View POs by job, inventory, equipment, work order and more. Create new POs, PO requisitions and material requests with ease.

The screenshot displays the 'Edit Line Item 2' configuration screen on the left and a mobile view of an invoice on the right. The configuration screen includes fields for Line Type (1-Job), JCCo (1 - Keystone Sample Comp...), Job (1000-), Phase (10-05-2009), JCCType (1), Material (Type to search...), and Amounts (UM: LS, Units: 0, Misc. Included: 0, Unit Cost: 0, Gross: \$750.00, Misc. Amt: \$0.00). The mobile view shows an invoice for 'West Coast Rebar' with a large green 'APPROVED' stamp overlaid on the table.

PURCHASING AGENT DASHBOARD

One-stop-shop to review and efficiently manage PO requests. Filters enable easy search and bundling of requests into a single PO.

BILLING COMPILER

Fast and easy creation of bill packages by eliminating manual processes required to collect, collate and combine documents. Bundle AP invoices, receipts, JC adjustments and more behind their respective phase codes.

OPEN BILLING REVIEWER

Track, comment and review open contract billings. Improve collaboration by giving finance visibility into why operations have help back on paying individual bills
