

If your girlfriend or spouse is pregnant, you are now a parent. Whether planned or unplanned, being pregnant can feel overwhelming. This is normal. The child she carries is developing into the person specifically designed and planned by God, with a specific purpose. As a unique person, he or she already has their own DNA, a beating heart, foundations of a brain, a spinal cord and nervous system. Later in pregnancy your baby will start copying her physically to learn what it can from its mommy.

Our Team is available to **HELP YOU** and we are your friends who care about you and your baby and you won't be left alone.

Together, we can overcome any obstacle you are facing to help her carry and care for your precious child before and after birth.

Life from you and her is so special, and it makes it so intrinsically valuable. This human being will become your closest friend and someone that will always be a part of you. This child of yours hopes for you. Everything depends on you both. So, Let's give you a Baby Shower!!

Everyone Deserves A Life—Dad.

Fatherhood Project

Dads are an important part of a child's life. This is a mentoring program for men that gives them the support they need to be encouraged and feel strong in their parenting and relationship with the mom.

Were you involved in an abortion decision?

- ? left out of the decision making process, only learning of the pregnancy after the abortion.
- ? opposed an abortion openly but she still chose abortion.
- ? hidden your true feelings about abortion in an attempt to allow for her choice & control over her body.
- ? been undecided on your preferred outcome, so went along with your partner's choice.
- ? supported and encouraged her in the decision to abort.
- ? pressured her to abort, even threatening to leave her if she didn't or removed your support from her by not engaging in the decision making process, thus leaving all of the responsibility in her hands.

– Transgender thoughts –

The adolescent body and brain are dynamically growing and maturing, but has not acquired the executive brain function of an adult. The ACPeds has produced materials specifically addressing adolescent development.

You Deserve to be Sure

- Do I want to be on medication for the rest of my life?
- Am I ready to be sterile?
- Can I live with this decision forever? Have I ever changed my mind before?
- Have I talked to people who care about me and can offer me other options?

your pain is REAL

You are not alone, and we want to help
