

You knit me together in my mother's womb. I praise you, for I am fearfully and wonderfully made.
(Psalms 139: 13-16)

You knit me together in my mother's womb. I praise you, for I am fearfully and wonderfully made.
(Psalms 139: 13-16)

You knit me together in my mother's womb. I praise you, for I am fearfully and wonderfully made.
(Psalms 139: 13-16)

You knit me together in my mother's womb. I praise you, for I am fearfully and wonderfully made.
(Psalms 139: 13-16)

Venerable Jérôme Lejeune
was a Catholic scientist who
discovered that Down
syndrome is caused by an
extra chromosome. He
hoped this breakthrough
would lead to treatments or
even a cure, and for a while
he was among the most
celebrated geneticists in the
world. Over time, however,
his discovery came to be
used not to support
individuals with Down
syndrome, but to identify
them through prenatal
screening in order to prevent
their birth. Deeply troubled
by this, Dr. Lejeune became
an advocate for children in
the womb. As a result, he
was ostracized by many in
the medical community.
However, he was also
appointed the first president
of the Pontifical Academy for
Life by Pope John Paul II. He
held this role until his death
in 1994.
