

Published in association with the Division on Career Development and Transition of the Council for Exceptional Children. The journal specializes in the fields of secondary education, transition, and career development of persons with disabilities. Published quarterly.

Types of Manuscripts

Scholarly manuscripts are original quantitative, qualitative, or mixed-methods research; scholarly reviews; and conceptual or discussion papers. For descriptions of research studies, (a) the research or evaluation method must be connected closely to the question(s) being addressed and (b) the setting, participants, and procedures should be described in sufficient detail to allow for possible replication. We welcome replication studies, as well as papers with strong methods that find null or negative results. All manuscripts should include compelling recommendations for secondary education and transition practice that could be applied at the system, program, or individual level. Manuscripts should be written in the active voice. **(35 manuscript pp.) Page count must include title/abstract page, references, main text, and all table and figure pages. Abstract, text, references, and tables should be double-spaced. Supplemental materials are not included in page count.**

Manuscript Preparation

Authors should prepare their manuscript according to the *Publication Manual of the American Psychological Association (7th ed.; APA, 2020)*. The editors also recommend that authors follow established guidelines for high-quality research related to the methodology used in their study. Authors are encouraged to use the [Journal Article Reporting Standards \(JARS\)](#) as maintained by APA when reporting the details of their study procedures (e.g., sample size, data collection procedures, measures and covariates for each portion of your study).

Ethical Standards. Authors are expected to follow the ethical and legal standards outlined in APA's *Publication Manual* related to reporting data and authorship, disclosing funding sources and conflicting interests, and ensuring the rights of research participants. CDTEI also requires that authors certify that IRB approval or institutional exemption was obtained for any studies on which their work is directly based.

Data Citation Standards. All data sets and program code used in an article should be cited in the text and listed in the reference section. References for data sets and program code should include a persistent identifier, such as a Digital Object Identifier (DOI). See *APA Publication Manual*, Chapter 10, for formatting in-text citations and reference section entries.

Format. Please follow this format for your manuscript.

- 1. Title Page.** Submit a **SEPARATE TITLE PAGE FILE** with (a) article title; (b) names of all authors; (c) author affiliations, complete mailing address for contact author, e-mail addresses of all authors; and (d) any acknowledgments, financial disclosure information, author notes, or other text that could identify authors to reviewers.
- 2. Format:** 8½ × 11 in. document; 1-inch margins; double spacing, left alignment, Times New Roman 12-pt. type for text. Include title and abstract. **Text & table files MUST BE Word text; no PDFs.**
- 3. Tables.** Each table should start on a new page. **Tables should follow APA 7th guidelines;** please use Word's table functions and double space tables. All tables must be cited in text.
- 4. Endnotes.** Use endnotes sparingly. Number with Arabic numerals starting with 1 and continuing through article. Example: (see Note 1). **NO footnotes.**

Figures. These should be separate files, with each figure on a new page or file. Figures must be black and white only and production ready. Because most art will be reduced to fit, for text use a bold, sans-serif type that is large enough to be reduced and still be readable, and make sure rules/tick marks are at least 1 point in size. Acceptable electronic formats for art: JPEG, TIFF, EPS, Word. For scans/photos, download the SAGE Image Resolution Guidelines from the [CDTEI peer review site](#) (see Instructions & Forms).

Permissions. Obtaining written permission for material such as figures, tables, art, and extensive quotes taken directly, or adapted in minor ways, from another source **is the author's responsibility**, as is payment of any fees the copyright holder may require. Because obtaining permissions often takes time, start the request process as soon as possible. **Material taken from software or from the Internet also requires permission.** Authors can download a Permissions Request form at the [CDTEI peer review site](#) (see Instructions & Forms). Read any granted permissions carefully to make sure the language is broad enough to allow publication in all formats, including electronic and print. Failure to obtain permission will result in either removal of the particular item or pulling the article from the journal.

Authors for Whom English Is a Second Language. We highly recommend having a colleague or copyeditor who is fluent in English review the manuscript before submission.

Supplemental Material. CDTEI requires authors to disclose whether the data, code, and research materials used to conduct the study are publicly available, and if so, where and how to access them. Decisions regarding inclusion of supplemental material will be made by the editors as part of the acceptance process. Supplemental files, except for videos and podcasts, will be deposited to **Figshare** and assigned a DOI. Authors are responsible for scientific accuracy and file functionality of supplemental files; materials will not be copyedited, typeset, or proofread. Additional information and guidelines are available for download from the Instructions & Forms section on the [CDTEI peer review site](#).

Manuscript Submission

Submit electronically: <http://mc.manuscriptcentral.com/cdtei>

Log in or click the "Create an Account" option if you are a first-time user. Once logged in, click on "Author." Select "Start New Submission" link in the left-hand box and follow the submission steps. A guide and a videos playlist specifically for authors can be accessed on the main page via the Help link ([Author Support](#)).

Peer Review Process

CDTEI typically utilizes 3 or more peer reviewers per manuscript in a double-blind peer review process. Initial decisions are rendered within 3 months following submission.
