INFORMATION FOR AUTHORS

IEEE ELECTRON DEVICE LETTERS (EDL) publishes original and significant contributions relating to the theory, modeling, design, performance and reliability of electron and ion integrated circuit devices and interconnects, involving insulators, metals, organic materials, micro-structures, quantum structures, semiconductor structures, and emerging materials with applications in bioelectronics, biomedical electronics, computation, communications, displays, micro-electromechanics, imaging, micro-actuators, nanoelectronics, optoelectronics, photonics, and information technology. For more information, see http://www.ieee.org/edl.

The template and further guidelines on the preparation of manuscripts can be obtained from the IEEE Tools for Authors website at http://www.ieee.org/web/publications/authors/transjnl/index.html. In addition, guidelines on how to write for technical papers, a comprehensive list of pre-published and-to-be-published articles with full authors’ names, title, and DOI (where available). The manuscript, excluding the reference section, must not exceed 2 and 2/3 pages for a new submission (5 pages for a revised submission). Manuscripts that do not meet these requirements will be returned to the author.

Abstract: The abstract must be a concise yet comprehensive reflection of what is in your article. In particular, the abstract must be as follow: 1) a comprehensive introduction and must phrase the title accordingly. The abstract must be more than 100 words. 2) If the results presented in the paper are simulated, and Introduction and must phrase the title accordingly. The authors are required to clearly state this in the Abstract. 3) Written as one paragraph, and should not exceed 150 words. 4) Ensure that your abstract reads well and is grammatically correct.

References: Each reference cited must have a complete list of authors (no et al.), complete titles, first and last pages numbers, month and year. All references required to include the Digital Object Identifier (DOI), where available. Supporting documentation for cited references not yet published should be provided.

Native Language Author Names: IEEE supports the publication of manuscripts in Chinese (CKJ) authors in a natural language alongside the English versions of the names in the author list of an article. Chinese authors may use either Simplified or Traditional representations in technologies. Without the consent of the authors, a manuscript will be rejected without consideration. In addition, if the main results presented in the paper are simulated results, the authors are then required to clearly state this in the Abstract. 2) if the results presented in the paper are simulated results, the authors are then required to clearly state this in the Abstract. 3) Written as one paragraph, and should not exceed 150 words. 4) Ensure that your abstract reads well and is grammatically correct.

Manuscripts submitted to EDL must not be posted on any website prior to submission and while under the consideration for publication. The EDS publication policy considers manuscripts appearing on the Internet published work. Manuscripts submitted to EDL must not be submitted prior to submission and while under the consideration for publication. All submissions must include in their Introduction a persuasive argument supporting the need for rapid publication. This argument should be presented in a natural language form.

Pre-Submission Editorial Services: It is the authors’ responsibility to pre-proofread a publication-quality manuscript. Manuscripts that incorporate use of language, symbols, or units may not be sent out for review in order to conserve limited volunteer reviewer resources needed to evaluate the technical merits of a submission. Assistance with English grammar, and use of language, are provided prior to submission. If the manuscript is rejected or is under consideration for publication, the authors are advised to submit an updated manuscript.

Submission Requirement: All IEEE journals require an Open Researcher and Contributor ID (ORCID) for all authors. ORCID is a personal identifier for researchers. ORCIDs enable accurate attribution and improved discoverability of an author’s published work. The author will need a registered ORCID in order to submit a manuscript or review a publication. Manuscripts that do not meet these requirements will be returned to the author.

Submission Procedure: All manuscripts must be submitted electronically using IEEE’s web-based Author Submission and Peer Review System, ScholarOne Manuscripts. Please do not submit manuscripts directly to the Editor-in-Chief or the Publications Office. A cover letter stating explicitly that the manuscript is being submitted for publication in the Electron Devices Letters must accompany the manuscript. Manuscripts are uploaded to the manuscriptcentral.com website at http://mc.manuscriptcentral.com/edl. A user account is required to submit a manuscript, before creating a new account, please check to ensure that you do not have an existing account which is based on your e-mail address. Permissions for authors, stating that they are aware of and agree to the change must be submitted to the editorial office. This includes new authors as well as authors no longer on the byline.

Supplementary data: Supplementary data is not permitted and will not be included in the review process. Any supplementary files submitted will be removed by the editorial administrator.

Submission Format: Authors must submit their manuscripts in the two-column format using the IEEE Template style. The font sizes and line spacing must not be altered on the template.
