INFORMATION FOR AUTHORS

Subject Matter: IEEE TRANSACTIONS ON GEOSCIENCE AND REMOTE SENSING (TGRS) is a monthly publication that focuses on the theory, concepts, and techniques of science and engineering as applied to sensing the land, oceans, atmosphere, and space; and the processing, interpretation, and dissemination of this information. This journal publishes technical papers disclosing new and significant research. The technical content of papers must be both new and significant. Experimental data must be complete and include sufficient description of experimental apparatus, methods, and relevant experimental conditions.

Style: TGRS is addressed to readers with a wide variety of interests. The author should refrain from using terminology that may not be familiar to readers and carefully explain terminology that is used. In addition, the author should provide brief introductory remarks and references that will permit the reader to relate the paper to other work in the author’s field of interest. The English language is a key to efficient communication. Papers must be both new and significant. Experimental data must be presented in such a way that other researchers can reproduce the results. The technical content of papers disclosing new and significant research. The technical content of papers must be both new and significant. Experimental data must be complete and include sufficient description of experimental apparatus, methods, and relevant experimental conditions.

The graphical abstract should provide a clear, visual summary of your content of the article, and you must provide it for peer review during the article submission process.
