

# Seven Essential Steps

## for a Smooth Start to Planting Season

### 1 Is Your Equipment Compatible?

**Yes. Let's go to Step 2.**

I've already confirmed.

**I'm not sure. How do I check?**

Check your equipment's compatibility at [SetupClimateFieldView.com](https://SetupClimateFieldView.com).

### 2 Have You Mapped Your Field Boundaries?

**Yep. Ready for Step 3!**

If you have already mapped field boundaries, review the boundaries and make sure they are clean.

If you need to edit boundaries, log in to your FieldView™ account at [Climate.com](https://Climate.com).

Once boundaries are clean, ensure CloudSync is enabled in the FieldView™ Cab app and sync to cloud. If needed, force a CloudSync by clicking the circular arrow and allow the CloudSync process to fully complete. Monitor the CloudSync status on your FieldView Cab app homepage.

**Nope. How do I do that?**

Learn more about [mapping fields](#) with FieldView.

Map your field boundaries or upload historical field data into your FieldView account by using the Data Inbox tool.

### 3 Do You Have the Latest Version of the FieldView Cab App?

**Oh, yeah. Take me to Step 4!**

**What version are we on?**

Download or update your [FieldView Cab app in the iOS app store](#).

**4** Here We Go! You're Ready to Add Hybrids and Applications.

**Done and done! Let's go to Step 5.**

**Can I get a refresher?**

Definitely! Check out our [video](#) on collecting data and putting it to work for your operation.

**5** Perform a CloudSync to Upload Your Prescriptions into the FieldView Cab App.

**Got it! On to Step 6.**

**A little help here, please.**

No problem. First, ensure CloudSync is enabled in the FieldView Cab app. Then, if needed, force a CloudSync by clicking the circular arrow and allow the CloudSync process to fully complete. Finally, you can monitor the CloudSync status on your FieldView Cab app homepage.

**6** Now, Let's Set Up Your Equipment.

**Check! Ready for Step 7.**

**Let's do it!**

All the info you need to [set up equipment in the FieldView Cab app](#) - including for planters, sprayers, air seeders, tractors, and combines.

**7** Okay! Time to Install Your FieldView™ Drive and Pair it With the FieldView Cab App or Update Your Precision Planting 20/20 SeedSense®.

**Way ahead of you.**

**Is there a 97-second video I could watch to make sure I install it correctly?**

[Yes.](#)
