

# › Connecting Climate FieldView and SST Summit

## How to Export Fields from SST Summit Professional and Import into Climate FieldView

### + Summary:

Users of SST's Summit Professional can export Field Boundaries to a grower's Climate FieldView account. The grower can then import the fields into the Climate FieldView website. Imported Fields are then visible in Climate FieldView Prime/Plus/Pro supported mobile and web applications.

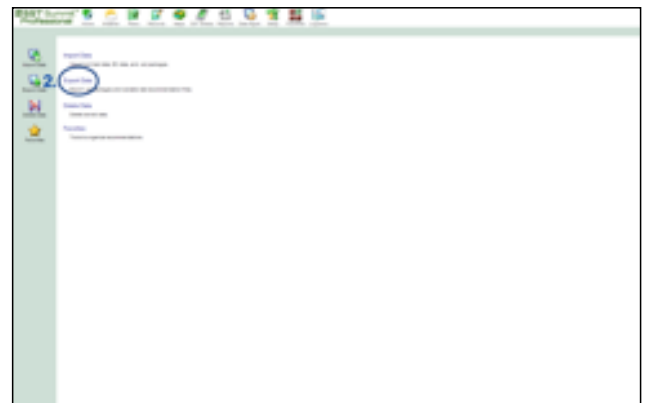

Farmers are using FieldView on more than **90 million acres** and leading every other non-equipment software provider in awareness, usage and acres.

### + Step #1: Export Fields from Summit

1. Select External Data

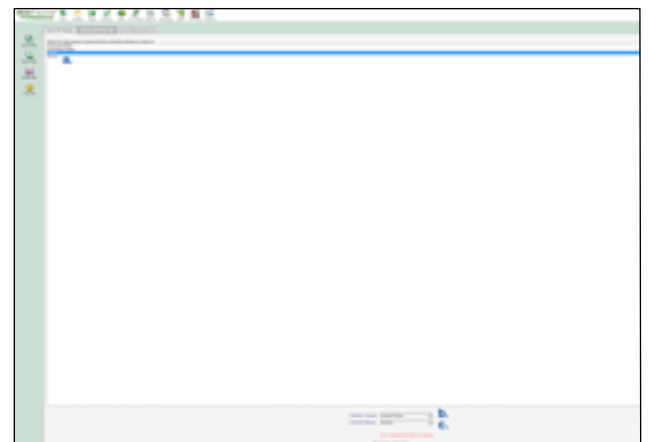

2. Select Export Data

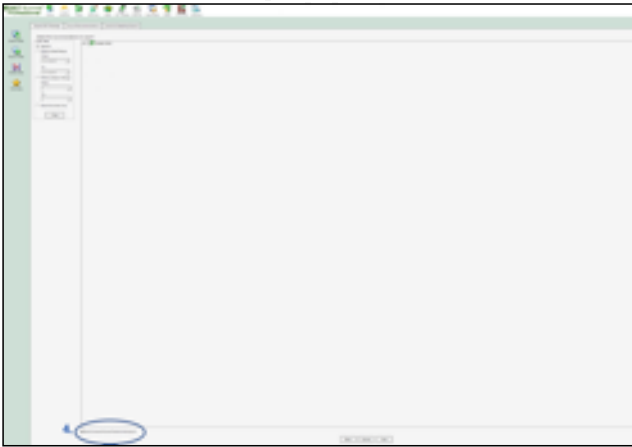

3. Go to Export Recommendations and Choose:

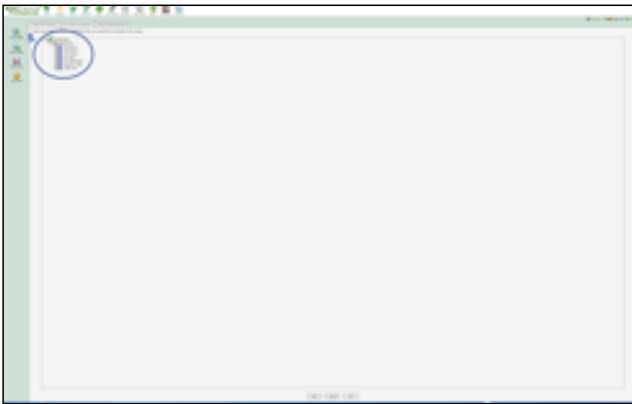

- Planting
- Precision Planting
- FieldView (select Next)

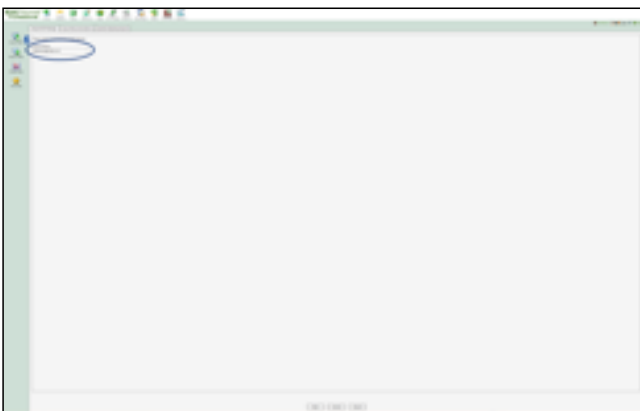

4. Select the Grower/Farms/Fields check box at the bottom of the screen and (select Next).

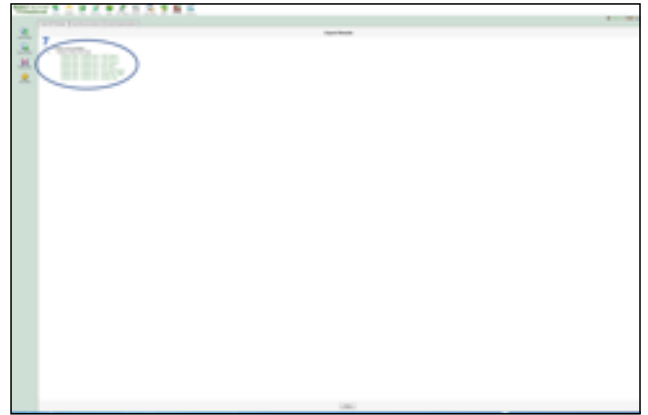

5. Select a Single Grower that you'd like to export
  - a. Check the boxes next to each Farm/Field to export (select Next)

6. Enter email address of Grower's Climate FieldView Account (select Next)

7. Export Results will be displayed as a confirmation

8. Upon a successful export of Fields, the grower will receive an email notification.

## + Step #2: Import fields into the Climate FieldView website

1. Login to [www.climate.com](http://www.climate.com) and (select Add/Edit Fields)
2. Click on the Data Inbox and select the field(s) you wish to import
3. Fields will imported automatically into your Climate FieldView Prime/Plus/Pro account
4. If you need assistance with this step, please contact Climate FieldView Support.
