

Body Worn Cameras For Law Enforcement

First Person POV Camera Solution

Body worn cameras are proven to decrease use of force incidents (UOF) and reduce false complaints by citizens – they keep everyone in line, on both sides. Safety Vision's body camera, the Prima Facie, exhibits the ability to record video, take high resolution stills, or only record audio – Prima Facie's always provide the most appropriate evidence collecting solution. A Prima Facie is one of the least expensive pieces of equipment a user can have on their body or in their car, and it provides maximum value.

A. Prima Facie®

Instantly recall recorded audio, video, and still pictures with the integrated 2" color LCD screen and speaker. Data may not be deleted from the device without authorized access.

- One-touch recording
- Pre-event recording
- 1080HD resolution
- 120° field of view (FOV)

B. 8-Bay Docking Station

The 8-bay docking station allows up to eight Prima Facie units to charge or upload video and data at once, making possible efficient management for agency-size deployments. The docking station can be mounted on any flat surface and includes the appropriate software.

- 2x USB 3.0 inputs
- Fast and convenient
- Includes software

C. Radio Cables and Covert Earpiece

Radio cables allow the Prima Facie to replace the remote microphone commonly worn near an officer's shoulder. The OTTO® Communications covert earpiece allows radio traffic to be monitored discreetly instead of broadcast over the speaker.

- Contact SV for compatibility
- Most radio models are compatible

D. PrimaView™

PrimaView is an advanced Video Management System (VMS) used to quickly and easily search for and locate specific media, categorize it, and maintain it. Functionality includes managing different levels of user access, automatic file retention policies, and quick export options.

- Convenient export options
- Advanced security
- Detailed history reports
- Easy storage management
