

Law Enforcement Video Surveillance

In-Car Video Solution

Over the past decade Safety Vision® has earned a solid reputation by providing law enforcement professionals with rugged and reliable video capture and management systems. Included in this product array are in-car video systems, mobile DVRs, monitors, dash cameras, and mics, as well as body worn cameras.

A. ICOP™ PRO DVR

Use the innovative 'mirror recording' feature to duplicate recorded events to a removable yet lockable SD card. The PRO has one of the smallest footprints in the market. Easily pull video via forward-facing USB port.

- 4 channels
- 128 GB (max) mirror storage
- Wi-Fi (integrated)
- Continuous or event recording

B. Power Control Monitor

Either supplementing or replacing an MDT, this monitor is used to view live video streams, playback previously recorded footage, operate the cameras, and configure the DVR system.

- 4.3" LCD screen
- Speaker
- Incorporated DVR controls
- Covert mode (dimmed lights)
- Standby mode (event prompted)

C. MCAM2 & SV-CFRC

One camera is placed adjacent to the rearview mirror and is angled through the windshield to capture forward-facing views. A secondary camera faces the cabin of the vehicle to document suspects' behavior.

- License plate auto-focus
- IRs capture cabin activity
- Auto switching day/night mode
- LEDs provide recording status from outside vehicle

EXTREME™ Wireless Mic

The EXTREME wireless mic is still the mic of choice for the ICOP PRO. The EXTREME mic has an industry leading range of over 2,500 feet.

- 2 mic base station included
- Auto syncing and standby
- Integrated DVR controls
- Exceptional audio quality
- 9 hours of battery life
