

LEADING THE CHARGE IN GOVERNMENT & EDUCATION

In the US alone, 75% of college students regularly use laptops and phones to complement their studies, making backup power just as essential a school supply as pencils and paper. Charging stations placed in lecture halls or at communal areas can provide students a quick charge at a moment's notice. Whatever the campus' specific needs, a personalized charging solution exists to address them.

Innovative charging solutions for State and Local Government and Educational Institutions.
