How to Use this Guide

Provide two sets of plans and complete the following:

1 **Complete this Building Guide** by filling in the blanks on page two, and indicating which construction details will be used.

2 **Provide 2 Plot Plans** (site plan) showing dimensions of your project or addition and its relationship to existing buildings or structures on the property and the distance to existing property lines drawn to scale.

3 **Fill out a building permit application.**

The majority of permit applications are processed with little delay. The submitted documents will help determine if the project is in compliance with building safety codes, zoning ordinances and other applicable laws.

The Colorado Chapter of the International Code Council is a professional organization seeking to promote the public health, safety and welfare to building construction. We appreciate your feedback and suggestions. To obtain a master copy of this building guide, please write to the Colorado Chapter of the International Code Council, P.O. Box 961, Arvada, CO 80001.

This handout was developed by the Colorado Chapter of the International Code Council as a basic plan submittal under the 2003 International Residential Code. It is not intended to cover all circumstances. Check with your Department of Building Safety for additional requirements.
Single Family Residential Patio Covers & Carports

Directions

1. Fill in the blanks with dimensions and materials which will be used to build the structure. Please print legibly.

2. Indicate in the check boxes which details from page 3 will be used. Please note if any of the sides of your carport addition are closer than 3'-0" to the property line, that side of the carport must be enclosed with a solid 1 hour fire rated wall as shown in Alternate Details B and C. You must however, keep at least two sides of the carport open to conform to the building code requirements. Zoning approval is required.

3. Roofing to be installed per manufacturer’s instructions, including low slope application and required inspections made.

Size and Amount of Lags

| (example: Two 3/8"x 4 1/2" lags @ 16" O.C.) |

Patio Section

- Overhang
- No closer than 2 feet to property line
- Beam splices to occur over posts with 1 1/2" bearing
- Maximum rise 7 3/4" at door
- Isolate from Slab
- Concrete Slab
- Minimum Diameter Pier 8"
- Minimum Diameter Pier 8"

Check one:
- Detail A
- Alternate A
- Detail B
- Alternate B
- Detail C
- Alternate C

Check one:
- "x" rafters spaced ___" O.C.
- Sheathing
- 2x
- Span
- (example: 12' 0"
- Siding
- (for Alternate B only)

Check one:
- "x" posts spaced ___ apart
- Minimum Diameter Pier 8"
- Minimum Diameter Pier 8"
- Footing
- (for Alternate C only)

Directions

1. Fill in the blanks with dimensions and materials which will be used to build the structure. Please print legibly.

2. Indicate in the check boxes which details from page 3 will be used. Please note if any of the sides of your carport addition are closer than 3'-0" to the property line, that side of the carport must be enclosed with a solid 1 hour fire rated wall as shown in Alternate Details B and C. You must however, keep at least two sides of the carport open to conform to the building code requirements. Zoning approval is required.

3. Roofing to be installed per manufacturer’s instructions, including low slope application and required inspections made.
