

## Day 5

Transmission: 33:33

Music: [Gaian Choir - Sean Maher](#)

Connecting to a new location, we shift our focus to inter-planetary and cosmic connections.

The surface of the planet is not the only location of conscious life on Gaia. There are and have been many civilizations that reside within the belly of Gaia. Many vibrating at different dimensional frequencies than the one we are currently experiencing - some of human descent and some not.

As we shift our connection to a vortex of Light approximately 30 miles east of Easter Island, we tap into an interdimensional portal of Light which connects us to experiences and lifetimes when we resided within Gaia.

This portal also opens us up to cosmic Light coming in from the Pleiadian Star System, which most of the current civilizations within the Pacific or Ring of Fire region of the world credit our origins.

This portal is one that is almost completely undistorted by human experience and brings with it a powerful clearing of our physical bodies to facilitate an upshift to hold this frequency.

You may experience a deep clearing and purification from this activation, as it focuses on the liver and kidneys within your body. If you are in the process of a gentle cleanse, it proves to be a wise decision. If you are not, now is the time, if possible. Always, always, always follow your own inner guidance.
