Getting to know your Echo Plus

1. Plug in your Echo Plus & wait for Alexa to say hello
Plug the power adapter into your Echo Plus and then into a power outlet. A blue light ring will begin to spin around the top for about 1 minute. Alexa will greet you and let you know it's complete setup in the Alexa App.

2. Download the Alexa App
Download the latest version of the Alexa App from the app store. The app helps you get the most out of your Echo Plus. It’s where you set up calling and messaging, and manage music, lists, settings, and news.
After you open the Alexa App, if you are not prompted to set up your device, tap the Devices icon in the lower right of the Alexa App to get started.

Optional: Set up your compatible Zigbee smart home devices
If you have a compatible Zigbee smart home device that you are ready to set up, simply say “Alexa, discover my devices” or tap the Devices icon in the lower right of the Alexa App.
Power on your compatible Zigbee smart home devices or put them into setup mode. For help and more information, go to Menu > Help & Feedback > Alexa > Smart Home in the Alexa App.
You can also manage and remove devices in the Smart Home section of the Alexa App.

Getting Started with your Echo Plus

Where to put your Echo Plus
Echo Plus works best when placed in a central location, at least 8 inches from any walls. You can put Echo Plus in a variety of spots—on a kitchen counter, the end table in your living room, or a nightstand.

Talking to your Echo Plus
To get the attention of your Echo Plus, simply say “Alexa.”

Give us your feedback
Alexa will improve over time, with new features and ways to get things done. We want to hear about your experiences. Use the Alexa App to send us feedback or visit www.amazon.com/devicesupport.
