Batteries:

Four AA batteries (included)

Echo Wall Clock

Drywall anchor

Wall Mounting Instructions

1. Attach the wall plate (1) to the back of your Echo Wall Clock. Your Echo Wall Clock will be securely attached to the wall plate. To do this, simply line the wall plate up with the wall anchor and push it into the wall until it clicks. 

2. If you need to remove the wall plate, press the button on the side of the wall plate to release it from the wall anchor. 

3. Insert the screws (2) through the holes in the wall plate (1) and secure them with the wall anchors (3). 

4. Insert the drywall anchors (4) into the holes in the wall plate (1) and secure them with the screws (2).

Status Color Description

Three blinks red: An error occurred
Pulsing blue: Time syncing or software updating
Pulsing orange: In pairing mode
Pulsing yellow: Notification received
Paired: Your device is paired and showing other interactions
In pairing mode: Your device is not paired

Maintenance of your Echo Wall Clock

Do not expose your Echo Wall Clock to direct sunlight or extreme temperatures. It is designed to withstand temperatures from 0°C to 35°C (32°F to 95°F). Do not expose your Echo Wall Clock to extreme temperatures, such as in a car or in direct sunlight. It is not designed to withstand extreme temperatures or conditions.

Other Safety Considerations

Small parts can present a choking hazard to young children. Be sure to keep them out of reach of children.

This product contains alkaline batteries. Your Echo Wall Clock is designed to work with these batteries, but it is not necessary to use them. You can use any alkaline batteries that are compatible with your device.
