Whispersync on Kindle Fire

Whispersync synchronize your content across devices so you can pick up right where you left off.

Whispersync for Kindle Books

Whispersync automatically synchronizes bookmarks, annotations, and your furthest page read of your Kindle content among Kindle devices and Kindle reading apps registered to the same Amazon.com account. When you open the same Kindle book on another Kindle device or app, you will be given the choice to go to the furthest page read across all your devices. This ensures that you can easily pick up where you left off.

Whispersync is enabled by default.

You can turn Whispersync Device Synchronization from the Settings tab of Manage Your Content and Devices.

With Whispersync off, your books will still open to the last page read on that device or Kindle reading app, but Whispersync will no longer sync your content with your other devices or Kindle reading apps.

To manually sync your Kindle content, tap the Quick Start icon, then tap Sync.

Whispersync for Personal Documents

Whispersync allows you to sync your notes, highlights, bookmarks, and furthest page read on your personal documents that have been converted to Kindle format using Kindle Personal Documents Service. Kindle Personal Documents Service also stores your personal documents in your Kindle Library for viewing and downloading to supported Kindle devices and Kindle reading app.

To learn more about Kindle Personal Documents Service, including supported devices, go to http://www.amazon.com/kindlepersonaldocuments.

Whispersync for Prime Video

Amazon's Whispersync technology keeps track of your last location in a video so you can resume watching across your Kindle Fire, PC, Mac, compatible TV, compatible Blu-ray player, or other device. For a list of devices compatible with Prime Video, go to http://www.amazon.com/gp/video/ontv/devices.

Note: Whispersync for Prime Videos cannot be turned off.
