### Gentleman Font Family

Gentleman font is a sans-serif font family of 10 weights – from hairline to black. It is a legible typeface with clear geometry and spiced with nice humanist terminals enhancing its identity. We think the name “Gentleman” works perfectly for this family because of its beautiful outlines and elegant letter forms. At the same time its looking tight, compact and has its very own presence. Gentleman is surely a good choice both for screen applications and print media.

Language Support: Afrikaans, Basque, Catalan, Danish, Dutch, English, Faroese, Finnish, French, Galician, German, Icelandic, Indonesian, Italian, Malay, Norwegian, Portuguese, Spanish, Swahili, Swedish

### Fancy Items Scene Generator

I wanted to create a set of scenes that would make a designer's life easier. A set so versatile, and of such high quality, you can use just about anywhere. So I've created the Fancy Items Scene Generator.

Included in this set:

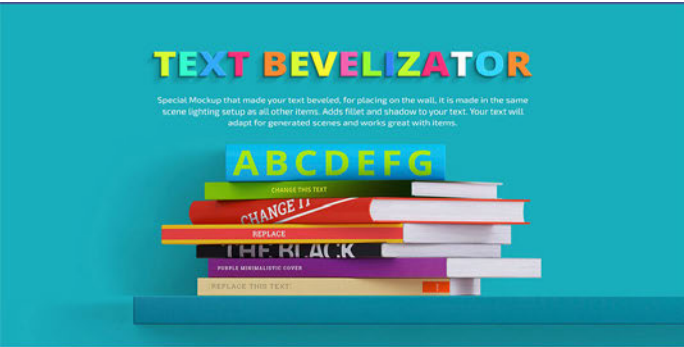

- Backgrounds
- Various items to be placed on shelves, tables, walls
- Actual shelf and table items
- 14 Pre made scenes
- Bevelizer and Shadow converter tools
- Demo video (in text file)
- PDF help guide

### SUPER BIG RESOLUTION

All items created in a big resolution and excellent quality, that allows you to create really huge scenes, can be used for Retina big screens and for print projects. Check the resolution of every item on the list of objects before buy.

VERY HANDY  
AND EASY TO USE

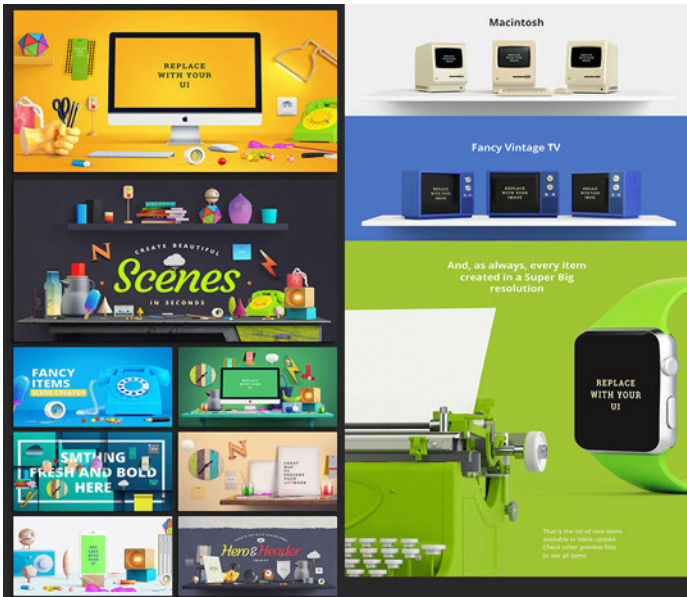

Every item was modeled, rendered and retouched. All items made in the in the same lightning setup, and rendered using a Super-Tele camera for minimum perspective distortion (but it's not orthogonal). The shadow is separated.

Use it for Websites, Banners, Hero Images, Header Images, Facebook Covers, Presentations, Apps, Book Covers, Flyers, etc. There is no limitation where and how you can use it.

## Mockup Zone

### iMockup Super Pack

Need the perfect Apple© product mockup? Then look no further. This is the biggest, most up to date iMockup bundle yet with tons and tons of devices, angles and features.

Included in this set:

- 57 different device renders, of all brand new Apple© devices, modeled and rendered in amazing high quality. (300 ppi and pixel perfect image sizes).
- All devices have been designed with real sizes and real screen resolutions.
- Also there are Safari and Chrome browsers mock ups. To help you creating unique presentation
- All devices separated PSD files.
- Fully layered shadows and screen reflections.
- 22 ready made showcases (you can move, scale or rotate the devices as required)
- Drag & Drop Showcase Generators. Maybe the best thing about this package. There are two generator PSD files ("Simple Showcase Generator" and "Studio Showcase Generator") The simple one offers plain background and shadow options, but the studio generator is truly amazing. You can drag & drop any device, and then replace the screen in seconds You can create your own backgrounds, or even your own environments. Light setups add a photorealistic scene.
- All new, unique device photos, you won't find anywhere else in this variety and high quality.
- Say no to layer chaos! When you use ready made showcases or generators you'll see just one smart object layer for each devices. so moving, scaling, rotating or applying effects is super easy.

Software requirements: Adobe CS4+

### Geometric Masks and Shapes Collection

This collection of geometric image masks and outline shapes provides a quick, simple and effective way for creating artwork when combined with photographs or other images.

Simple to use:

Just place the white masks and geometric shapes above your photographs or other images.

The Photoshop template supplied contains a variety of elements and individual layers, which can be toggled on and off. By placing your photos or images on the bottom layer, you can create a lots of different effects, quickly and easily.

Combine the different masks and shapes to create unique geometric patterns.

16 different combinations are included, supplied as transparent PNG files, and you can create many more variations using the Photoshop template

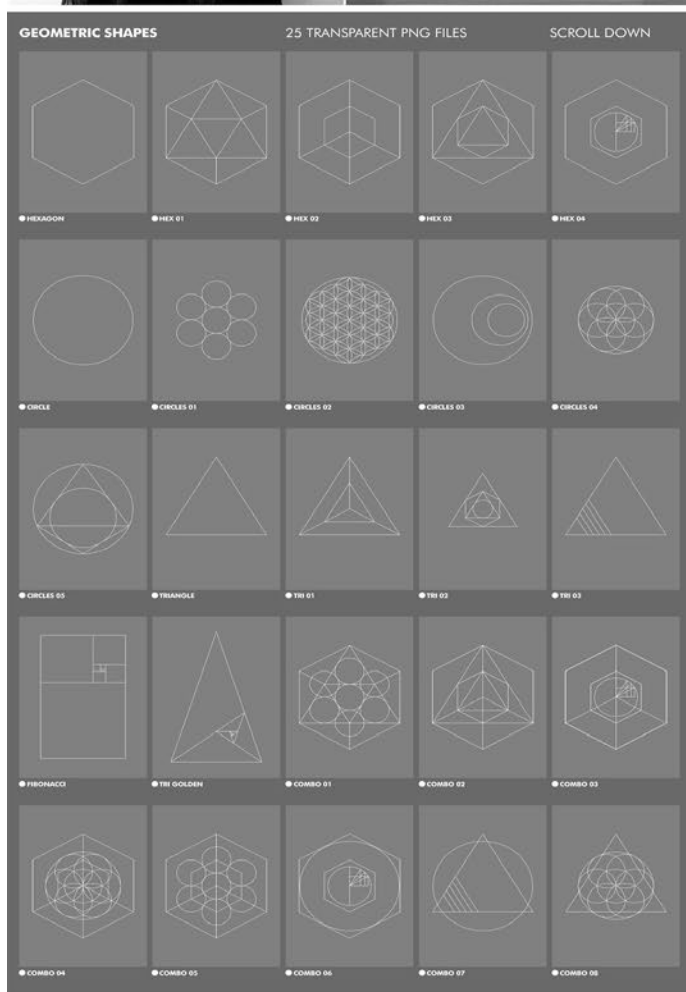

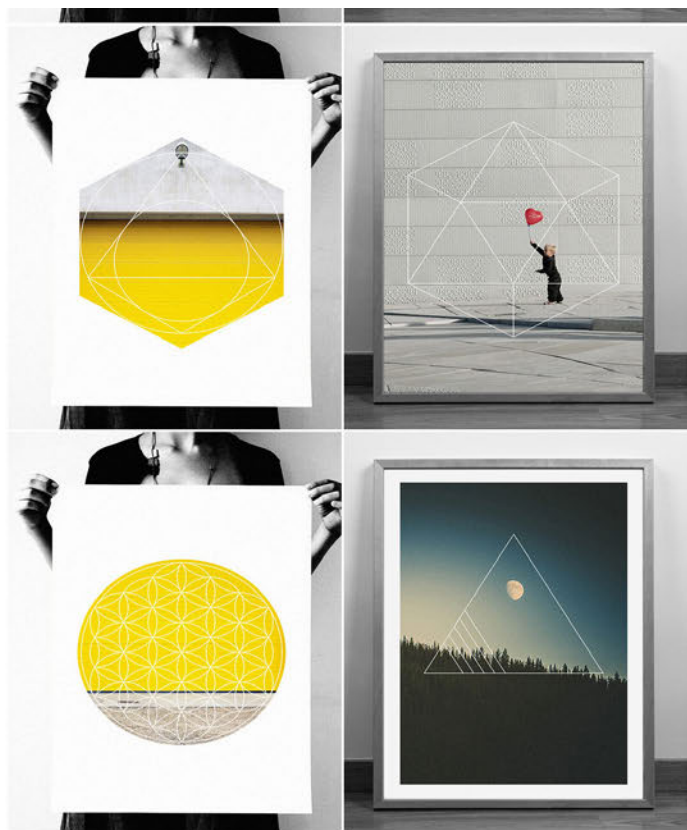

Included in this set:

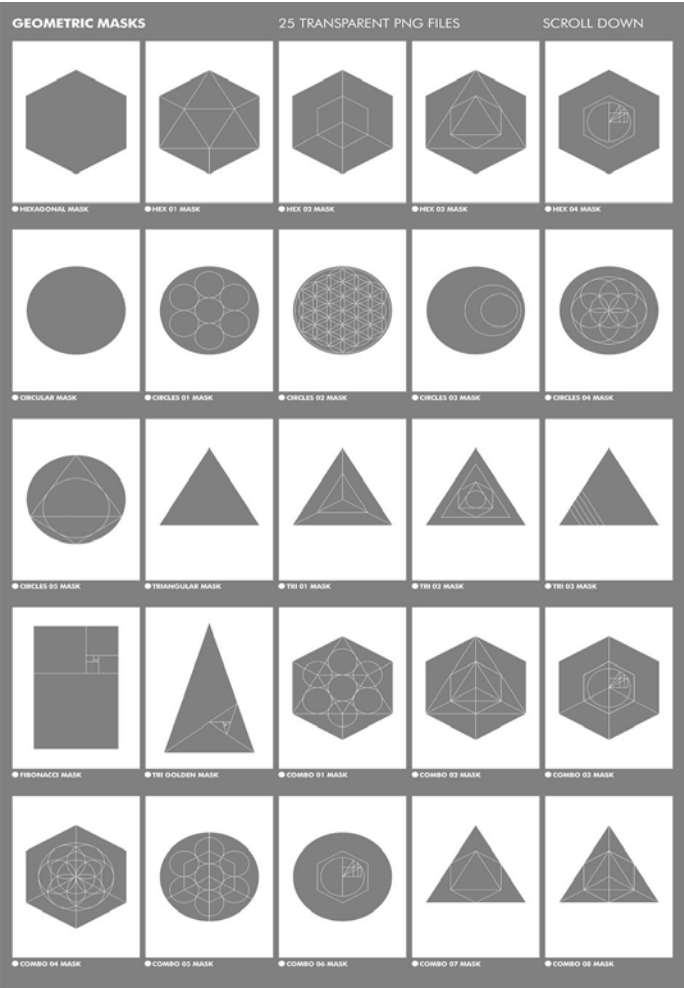

- Photoshop template with 22 elements each on separate layers.
- 25 white geometric image masks supplied as transparent PNG files.
- 25 white geometric outline shapes supplied as transparent PNG files.
- 2 PDF reference guides which contain visuals of all of the individual PNG files supplied, together with their file names.
- I've also included a layered TIFF file for anyone who may have very old versions of Photoshop or other applications that support layered TIFF documents.

## Textures and Image Masks Collection

A collection of 30 image masks and textures provides a quick, simple and effective way for creating artwork when combined with photographs or other images.

All of these masks and textures have been individually created and are exclusive to this collection.

Simple to use:

Just place the white masks or textures above your photographs or other images.

The Photoshop template supplied contains all 30 elements as individual layers, which can be toggled on and off. By placing your photos or images on the bottom layer, you can create a variety of different effects by combining elements together.

Combine the masks with the various textures supplied to create unique art print effects. Alter the opacity settings of layers to produce more subtle combinations or keep things simple and just incorporate individual elements.

Or paste the individual masks and textures into your own documents that support transparent PNG files such as Photoshop, Illustrator, Indesign etc.

Included in this set:

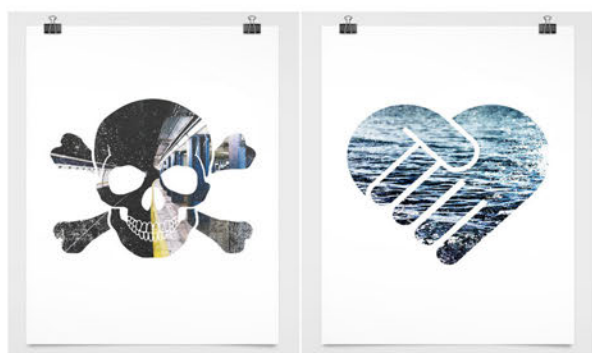

- 10 white image masks supplied as transparent PNG files.
- 10 white surface textures supplied as transparent PNG files.
- 5 white textured borders supplied as transparent PNG files.
- 5 white abstract textures supplied as transparent PNG files.
- A layered Photoshop template with all 30 elements on separate layers.
- Plus a high resolution PDF Reference Guide which contains visuals of all of the individual elements together with their file names.

### 30 Aerosole Shapes

Whether you're a graffiti artist or not, you can bring the gritty, urban textures of the spray can into your designs. An awesome set to have on hand for when you want it. The images are super high res so they're great for badges, logos, patterns, texture overlays, etc.

Included in this set:

- 30images files (JPEG)
- Dimensions: 5280×5280
- Resolution: 72 ppi

## Rule by Art

### Data Distortion

We love these grainy, unique 3D-inspired images, and will make you feel like you've left planet Earth. They're super high contrast so they also look amazing when inverted.

They make for beautiful ambient textured backgrounds. You can let your imagination go wild with this one...

Included in this set:

- 25 black and white images (JPEG)
- Dimensions: 4000×4000
- Resolution: 72 ppi

### Geode

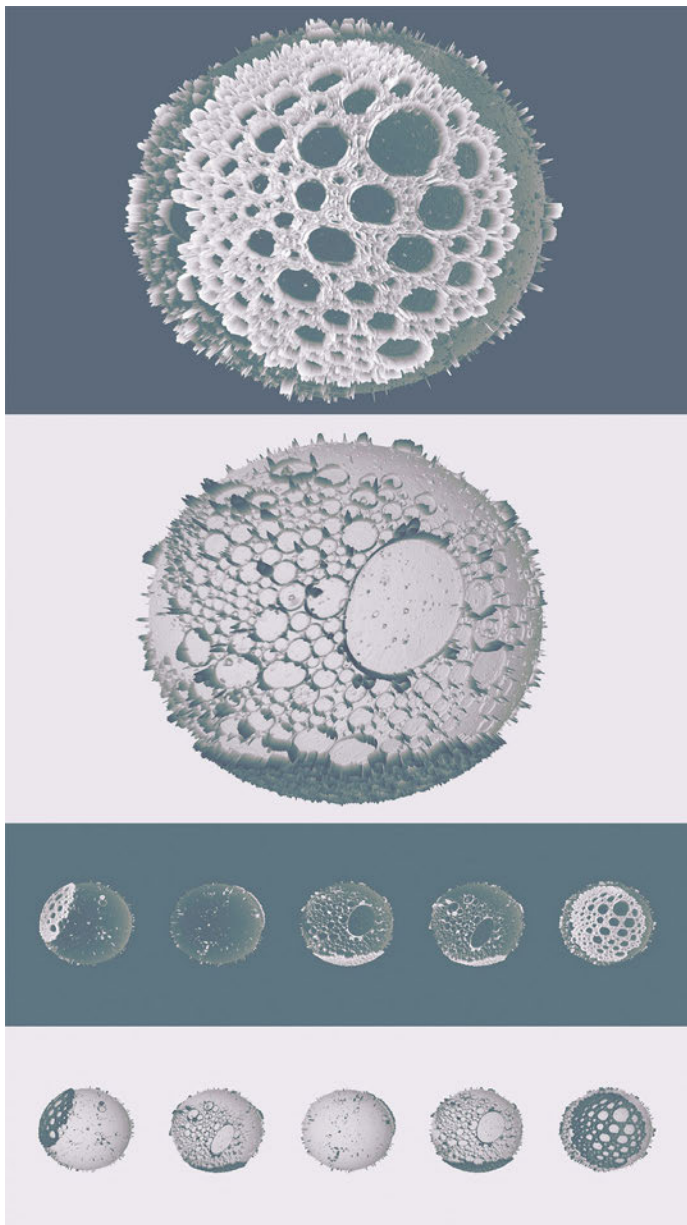

This collection contains 18 hi-res abstract images, perfect to be used as backgrounds, textures or overlays in your modern/ futuristic design projects. Their organic structures resemble volcanic rock formations.

## Rule by Art

### Lunar

Lunar is a set of 10 hi-res images evocative of a moon with detailed texture. These images are perfect to be used as backgrounds, textures or overlays in your modern/futuristic design projects.

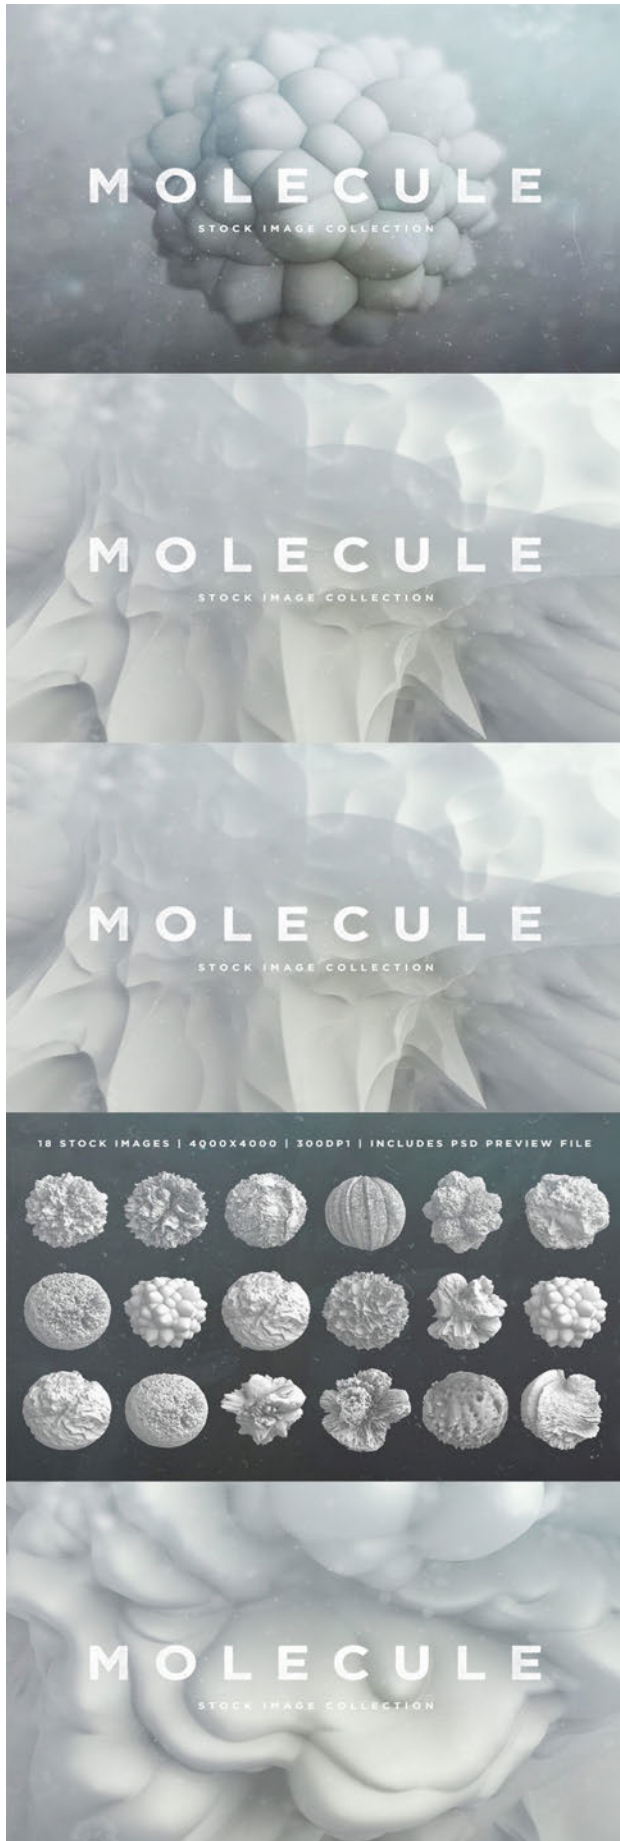

## Rule by Art

### Molecule

Molecule is a collection of 18 hi-res images, perfect to be used as backgrounds, textures or overlays in your modern/ futuristic design projects.

It's amazing how we humans perceive scale. A single word can cause a paradox change. Let's take this collection for example. What if the collection were called Ghostly Planets instead of Molecule? The scale would reverse and the images would be on a scale so huge it's hard to even imagine.

## Rule by Art

### Synth

We were down in Miami this week for Art Basel. After looking at as much art as is humanly possible within a 72-hour period my mind is still spinning with colour, paint and texture. Now looking at these vibrant images in Synth I can't help but notice their handmade feel – reminiscent of watercolour, stained glass and dyed fabric. Each image is beautiful from a distance as a whole and the high quality allows you to zoom in for endless compositions. Play with cropping to appreciate the vast possibilities in these beauties.

Included in this set:

- 25 image files (JPEG)
- Dimensions: 4000×3500
- Resolution: 300 ppi

## Rule by Art

### Watercolour Font

The world of fonts is experiencing exciting times right now, with so many amazing designers making their mark with new typefaces. Now let's nerd out on fonts for a minute, shall we? Giambattista Bodoni designed the Bodoni typeface in 1798 (most likely with a brush and ink). Over a century later, Chauncey H. Griffith created Poster Bodoni for none other than... Posters!

We've gone old school to suit the style of Poster Bodoni and created the entire font in watercolour by hand.

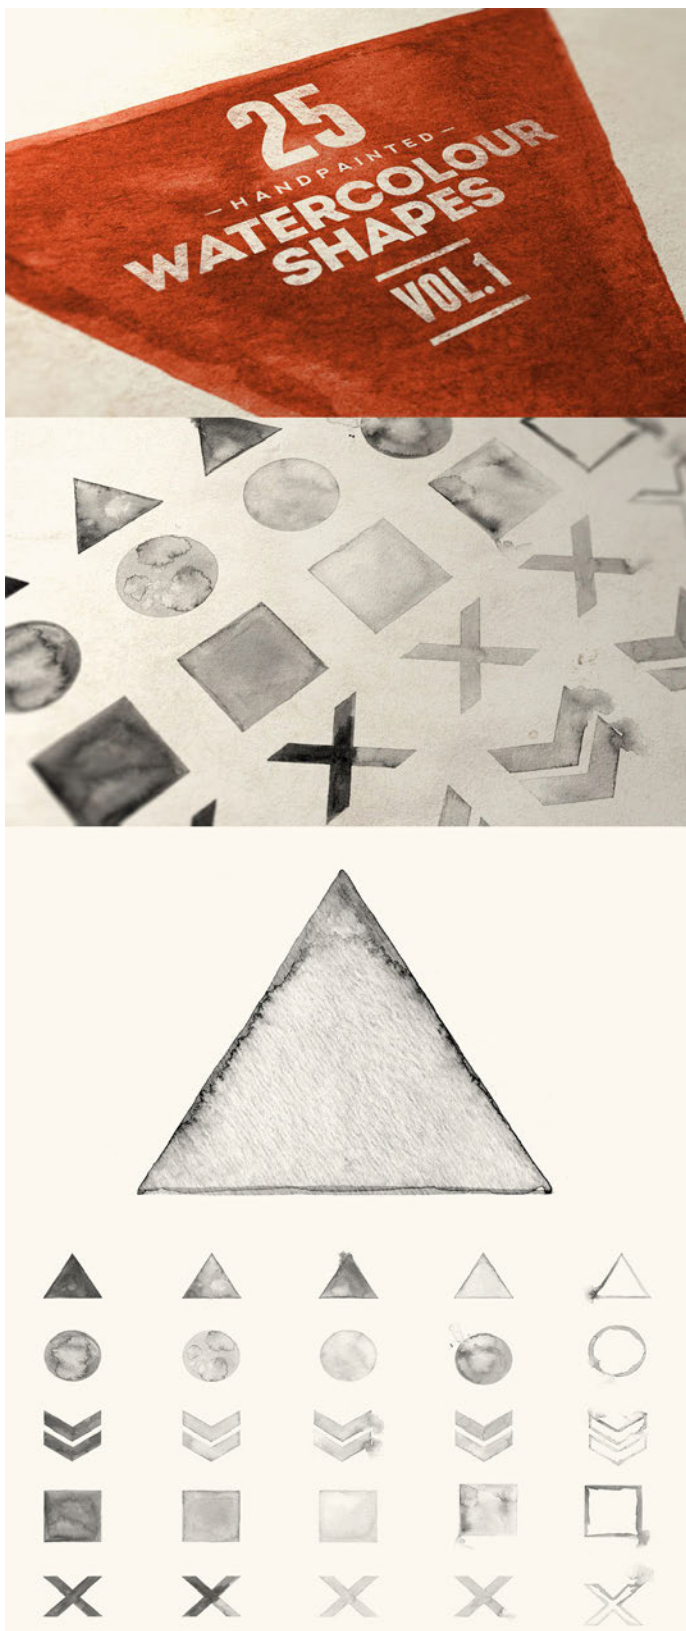

Includes a collection of 48 handmade font characters (including all letters, numbers and the most critical symbols).

Included in this set:

- 48 image files (JPEG)
- Dimensions: 4000×4000 (Per Letter)
- Resolution: 72 ppi

Please note: this is not a traditional font that you can type with, but rather a collection of artistic lettering that you can use for custom lettering projects.

## Rule by Art

### Watercolour Shapes

Watercolour is one of my favourite materials. The paint is unpredictable and challenging to use. The inconsistencies are what make the results so beautiful. Our goal with this project was to combine the imperfect nature of watercolour with basic shapes that designers can use over and over in their work.

We wanted to maintain clean edges while letting the material show its beauty within those edges. It was time-consuming, but a total labour of love. Hopefully you enjoy working with the results as much as I enjoyed creating the elements for you.

Included in this set:

- 25 image files (TIFF)
- Dimensions: 6000×6000
- Resolution: 300 ppi

## Seniors

### Roselina

Roselina is a contemporary calligraphy inspired typeface, with a vintage feel. The moving baseline give this font an elegant touch. Features 417+ glyphs and 183 alternate character. Including initial and terminal letters, alternates, ligatures and multiple language support.

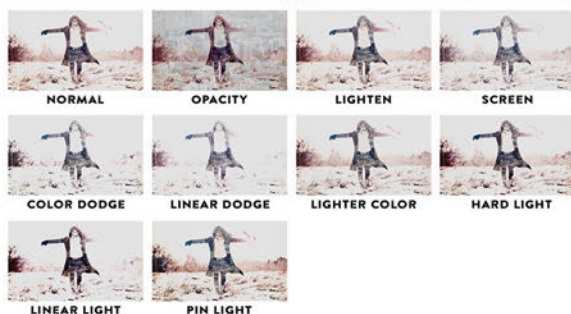

Included in this set:

- Roselina Script.otf
- Roselina Script.ttf

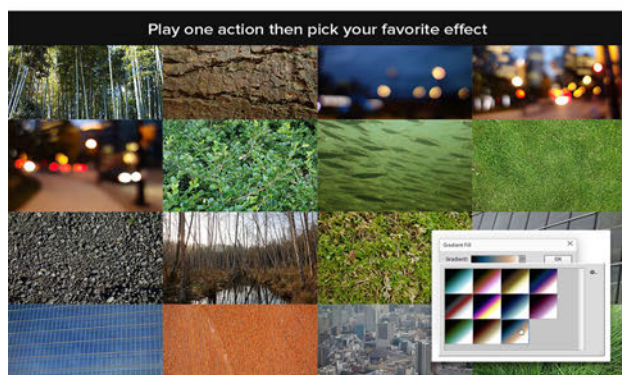

To enable the OpenType Stylistic alternates, you need a program that supports OpenType features such as Adobe Illustrator CS, Adobe Indesign & CorelDraw X6-X7, Microsoft Word 2010 or later versions. There are additional ways to access alternates/swashes, using Character Map (Windows), Nexus Font (Windows) or a software program such as PopChar (for Windows and Mac).

Language Support: Albanian, Basque, Catalan, Danish, Dutch, English, Estonian, Feroese, Finnish Scots, French, Gaelic, Galician, German, Hungarian, Icelandic, Indonesian, Irish, Italian, Nynorsk Bokmal Norwegian, Portuguese, Romanian, Slovak, Slovenian, Spanish, Swedish

- 10 Double Exposure Gradients

Software requirements: Adobe CS3+

# Tipo Type

## Libertad

Design can do without images, but not without typefaces.

Libertad is a sans-serif typeface that mixes humanist and grotesk models. It's most interesting feature is the combination of balanced regulars with dynamic italics, which makes it a very versatile font for different uses.

This typeface follows the Luc(as) de Groot's Interpolation Theory, that's why it has seven specially-calculated weights plus their matching italics, from thin to extra-bold. This allows it to be useful in big headlines and also small texts. It has more than 800 characters per weight and support for more than 70 languages.

Language Support: Abenaki, Afaan Oromo, Afar/Afrikaans, Albanian, Alsatian, Amis, Anuta, Aragonese, Aranese, Aromanian, Arrernte, Arvanitic (Latin), Asturian, Atayal, Aymara, Bashkir (Latin), Basque, Belarusian (Latin), Bemba, Bikol, Bislama, Bosnian, Breton, Cape Verdean, Creole, Catalan, Cebuano, Chamorro, Chavacano, Chichewa, Chickasaw, Cimbrian, Cofán, Corsican, Creek, Crimean Tatar (Latin), Croatian, Czech, Danish, Dawan, Delaware, Dholuo, Drehu, Dutch, English, Esperanto, Estonian, Faroese, Fijian, Filipino, Finnish, Folkspraak, French, Frisian, Friulian/Gagauz (Latin), Galician, Ganda, Genoese, German, Gikuyu, Gooniyandi, Greenlandic (Kalaallisut), Guadeloupean Creole, Gwich'in, Haitian Creole, Hän/Hawaiian, Hiligaynon, Hopi, Hotçak (Latin), Hungarian, Icelandic, Ido, Ilocano, Indonesian, Interglossa, Interlingua, Irish, Istro-Romanian, Italian, Jamaican, Javanese (Latin), Jèrriais, Kala Lagaw Ya, Kapampangan (Latin), Kaqchikel, Karakalpak (Latin), Karelian (Latin), Kashubian, Kikongo, Kinyarwanda, Kiribati, Kirundi, Klingon/Kurdish (Latin), Ladin, Latin, Latino sine Flexione, Latvian, Lithuanian, Lojban, Lombard, Low Saxon, Luxembourgish, Maasai, Makhuwa, Malay, Maltese, Manx, Māori, Marquesan, Megleno-Romanian, Meriam Mir, Mirandese, Mohawk, Moldovan, Montagnais, Montenegrin, Murrinh-Patha, Nagamese Creole, Ndebele, Neapolitan, Ngiyambaa, Niuean, Noongar, Norwegian, Novial, Occidental, Occitan, Oshiwambo, Ossetian (Latin),

### Shimmer and Shine

Using the technology behind my best selling product AquaType, I've managed to achieve realistic gold effects in vector format. All you have to do is choose 1 of the 18 Gold or Silver textures, click play and you're done. It's literally that easy.

The effect also adds inconsistent edges to the type, like you would get when gold leaf ruffles at the sides. At the same time it adds a hand written look to any font, which can be easily turned off if you're already working with hand drawn type.

Included in this set:

- 18 Seamless Gold Graphic Styles
- 18 Seamless Silver Graphic Styles
- 1 Gold / Silver Vectorize Action
- 9 Splatter Textures (.ai)
- Quick Setup Guide PDF (CS3/CS4/CS5)
- Quick Setup Guide PDF (CS6/CC)

Software requirements: Adobe Illustrator CS 3/4/5/6 and CC 2014 only. Will NOT work in Photoshop or CorelDraw.
