

Dexcom G6

THE POWER TO CHANGE HOW YOU LIVE WITH DIABETES

Zero fingersticks* or scanning required

No fingersticks* needed for calibration, treatment decisions, or insulin dosing**

Urgent Low Soon Alert

Predictive alert that can warn you up to 20 minutes in advance of glucose reaching 3.1 mmol/L or lower

Remote data sharing†

Capability to share real-time glucose data with up to five loved ones

10-day sensor wear

New, extended 10-day sensor wear

Smart device compatibility‡

Compatible with iOS and Android devices for convenient glucose monitoring

Easy to use

The Dexcom G6 is a small wearable you apply yourself

Dexcom CGM Lowers A1C^{1,3}

Proven to reduce A1C and decrease risk of hypoglycemia for people using insulin^{1,3}

Increases time spent in range^{1,3}

Dexcom CGM users spend more time in range than those using fingersticks

Reduces hypoglycemic events^{2,3}

Demonstrated to reduce the number of hypoglycemic events in people with diabetes

Pediatrics

The only CGM approved for ages 2 years and up

Empowering people to take control of their diabetes.
