

Product Features

Big Sky Triangle is a double-sided extrusion with a profile width of 36 mm (1.42 in.). Very similar to the BigSky-32D and BigSky-60D, Big Sky Triangle creates three-sided counters, podium and towers in varied sizes. Big Sky Triangle accepts three individual custom fabric graphics, excluding top and bottom. An inside corner extrusion can be added to make more complex shapes. You can add-on an acrylic countertop to convert the structure into a podium or counter display. LED lighting options are available to backlight your current or tower to help your message really stand out.
