SEG Fabric Frame Systems

Impeccable presentation the way you want it.

RESORT EXTRUSIONS

Impeccable presentation the way you want it.

SEG Fabric Frame Systems

The Resort Extrusions collection offers you the ability to customize your next display project. Within the collection, there are 18 different aluminum profile shapes. Choose your extrusion shape, display width and height, and we build it for you. Extrusion options include single-sided, double-sided, corner and supports for counters and towers. All extrusions are pre-manufactured with recessed grooves for the placement of soft and classy digitally-printed fabric Silicone Edge Graphics (SEG). Captivate crowds by adding lights for a backlit display. Affix finished frame to the wall, hang it overhead, or stand it independently. Retain your custom frame, and refresh with new graphics over time. Presentation is everything—make it impeccable with custom Resort Extrusions.

Impeccable presentation the way you want it.

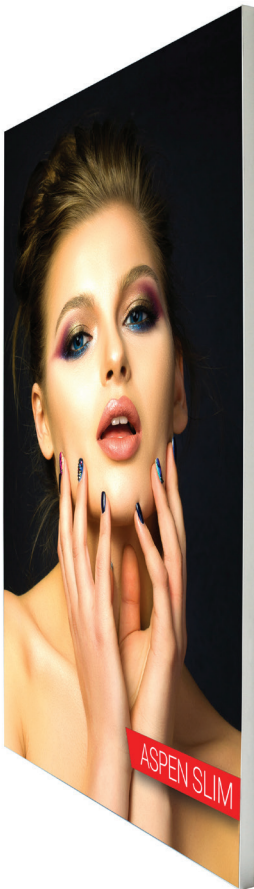

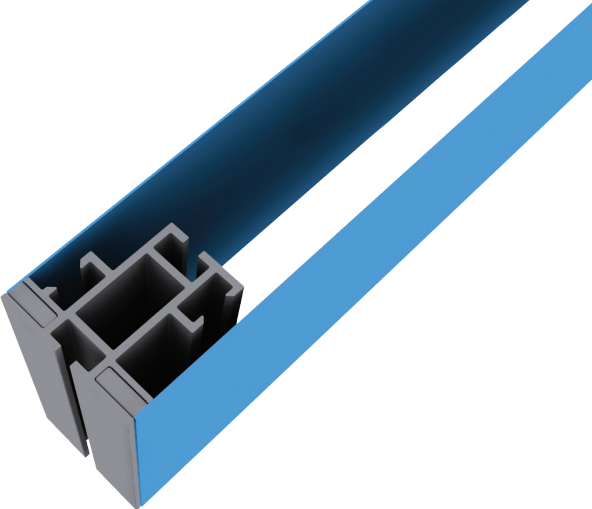

ASPEN SLIM

The ASPEN SLIM has a profile width of 19 mm. (.75 in.), making this single-sided SEG extrusion the thinnest of them all. Less than half the profile width of ASPEN-40D, the outside finish is solid and smooth aluminum. This extrusion is especially lightweight, making it great for wall mounting. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the trough of the frame. Not compatible with lights (cannot be backlit).

ASPEN-40D

A classic in the Resort Extrusion collection, the double-sided ASPEN-40D has a profile width of 40 mm. (1.6 in.). Aspen's finish has a system groove, like an indented stripe, for added style, but is purposeful for easily installing accessories. This extrusion is especially lightweight making it great for wall mounting and hanging overhead, but can also be stood independently with feet. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. Can be front lit using brackets (cannot be backlit). Also available in black.

Specifications

- 19 mm. (.75 in.) wide aluminum profile
- Single-Sided graphic display
- Accepts 12 mm. keder

Functions

- Wall mount display

Graphic Material

- Stretch Fabric

Package Includes

- (1) 4-Sided Frame
- (1-2) Custom Single-Sided Graphic (SEG hem)
- (4) Corner Connectors
- (1) 3 mm. Allen Wrench

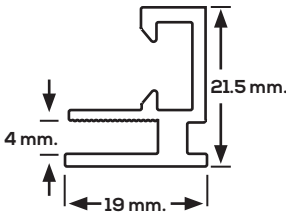

Available Options

- Split Connector 
- Wall Mounts (Qty: 4) 

Measurements

VAIL-40S

With a solid outside finish unlike the ASPEN-40D, the VAIL-40S is a single-sided extrusion with a profile width of 37 mm. (1.4 in.). The VAIL-40S is rigid because its backside has a longer metal edge for reinforcement, making it especially great for wall mounting and hanging overhead. Plus, it is lightweight; however, for widths longer than 8 ft., it is not recommended to be used as a free-standing display without a support because of its thin profile width. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. Not compatible with lights (cannot be backlit).

Specifications

- 37 mm. (1.4 in.) wide aluminum profile
- Single-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display

Graphic Material

- Stretch Fabric

Package Includes

- (1) 4-Sided Frame
- (1) Custom Single-Sided Graphic (SEG hem)
- (4) Vail Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

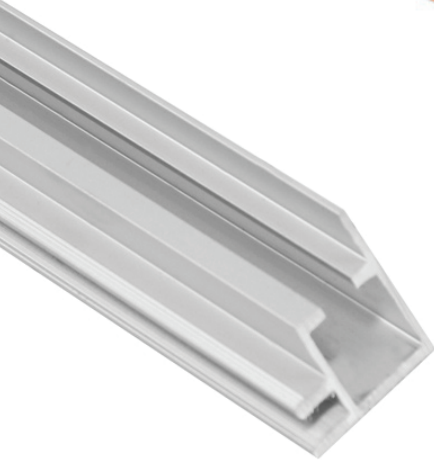

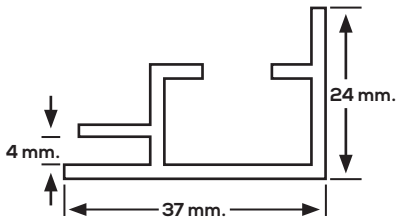

Available Options

- Split Connector
- Wall Mount (Qty: 4)
- Ceiling Eye Hook
- Variable Angle Connector (Qty: 4)
- Tool Free Connector Upgrade

VAIL-40D

The VAIL-40D is a double-sided extrusion with a profile width of 40 mm. (1.6 in.). The alternative extrusion in style to the ASPEN-40D, the VAIL-40D has a solid outside finish. It is especially great for wall mounting and hanging overhead because it is lightweight, but can be used with feet to stand independently as it is more stable than the VAIL-40S. Not compatible with lights (cannot be backlit).

Specifications

- 40 mm. (1.6 in.) wide aluminum profile
- Double-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display

Graphic Material

- Stretch Fabric

Package Includes

- (1) 4-Sided Frame
- (1) Custom Single-Sided Graphic (SEG hem)
- (4) Vail Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

VAIL-60S

The VAIL-60S is a single-sided extrusion with a profile width of 60 mm. (2.4 in.) This extrusion has a solid outside finish. VAIL-60S is best for standing independently since the profile width is just wide enough to provide ultimate stability. This extrusion works great overhead as well because of the thick profile width really stands out. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. Not compatible with lights (cannot be backlit).

Specifications

- 60 mm. (2.4 in.) wide aluminum profile
- Single-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display

Graphic Material

- Stretch Fabric

Package Includes

- (1) 4-Sided Frame
- (1) Custom Single-Sided Graphic (SEG hem)
- (4) Vail Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

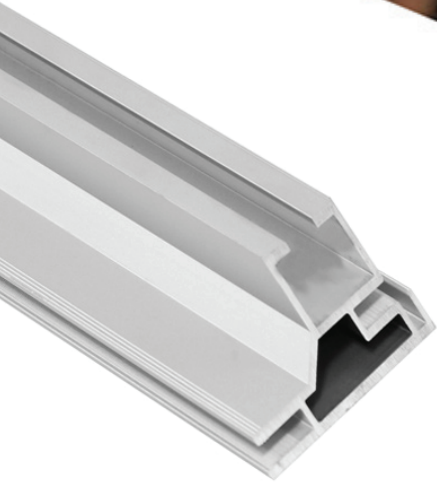

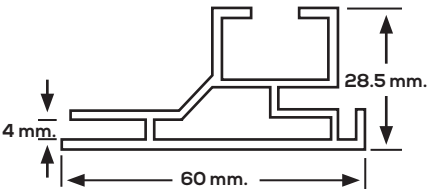

Available Options

- Vail Feet (Qty: 2)
- Yeti Feet (Qty: 2)
- Split Connector
- Wall Mount (Qty: 4)
- Ceiling Eye Hook
- Variable Angle Connector (Qty: 4)
- Tool Free Connector Upgrade

VAIL-60D

The VAIL-60D is a double-sided extrusion with a profile width of 60 mm. (2.4 in.) This extrusion has a solid outside finish. VAIL-60D is best for standing independently since the profile width is just wide enough to provide ultimate stability. This extrusion works great overhead as well because the thick profile width really stands out. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. Not compatible with lights (cannot be backlit).

Specifications

- 60 mm. (2.4 in.) wide aluminum profile
- Double-Sided graphic display
- Accepts 12 mm keder

Functions

- Free standing display
- Wall mount display
- Suspended display

Graphic Material

- Stretch Fabric

Package Includes

- (1) 4-Sided Frame
- (2) Custom Single-Sided Graphics (SEG hem)
- (4) Vail Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

- Length for Splits / Cuts In Extrusions**
- 96 in. Maximum

CUSTOM SIZES AVAILABLE!
Please call us for more information.

VAIL-80S

The VAIL-80S is a single-sided extrusion with a profile width of 80 mm. (3.2 in.) This extrusion has a solid outside finish. VAIL-80S is best for wall-mounted applications in retail environments because of its depth. However, it can be free-standing up to 8 ft. wide without a support extrusion, or over 8 ft. with an added support extrusion. When installing the fabric graphic, the silicone beading can fit 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. This display has enough space between the light-rail and graphic edge to be backlit, as an option.

Specifications

- 80 mm. (3.2 in.) wide aluminum profile
- Single-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display
- LED Lightbox

Graphic Material

- Stretch Fabric
- UV Backlit Fabric (Backlit)

Package Includes

- (1) 4-Sided Frame
- (1) Custom Single-Sided Graphic (SEG hem)
- (4) Vail Triangle Corner Connectors
- (16) Socket Screws
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

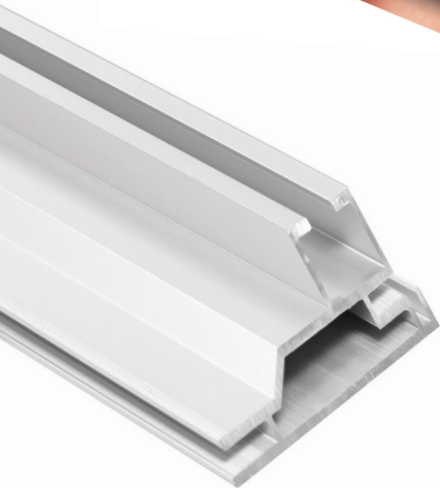

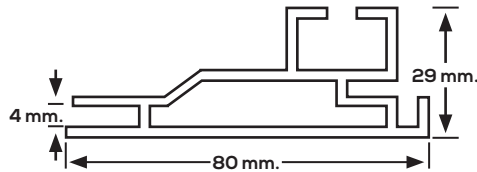

Available Options

- Split Connector 
- Resort Light Strip 
- Power Switch 
- Ladder Lights 
- Wall Mount (Qty: 4) 
- Ceiling Eye Hook 
- Variable Angle Connector (Qty: 4)
- Tool Free Connector Upgrade

Measurements

- 16 in. with Tool Free Upgrade
- Length for Splits / Cuts In Extrusions**
- 96 in. Maximum

CUSTOM SIZES AVAILABLE!
Please call us for more information.

VAIL-100D

The VAIL-100D is a double-sided extrusion with a profile width of 100 mm. (3.9 in.). This extrusion has a solid outside finish. Because the profile width is so thick, VAIL-100D is especially good for free-standing large images (tall or wide). It is more stable than the skinnier profile widths; however, it can be wall mounted or hung overhead as well. Not compatible with lights (cannot be backlit).

Specifications

- 100 mm. (3.9 in.) wide aluminum profile
- Double-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display

Graphic Material

- Stretch Fabric (Non-Backlit)

Package Includes

- (1) 4-Sided Frame
- (1-2) Custom Single-Sided Graphic (SEG hem)
- (4) Vail Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

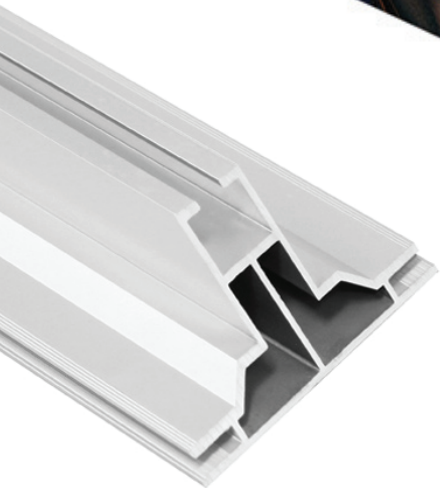

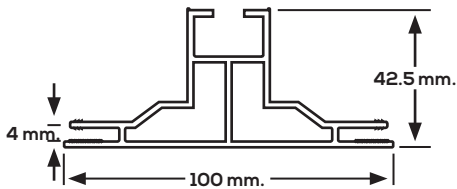

Available Options

- Vail Feet (Qty: 2)
- Yeti Feet (Qty: 2)
- Split Connector 
- Wall Mount (Qty: 4) 
- Ceiling Eye Hook 
- Variable Angle Connector (Qty: 4)
- Tool Free Connector Upgrade

Measurements

VAIL-120DB

The VAIL-120DB is a double-sided extrusion with a profile width of 120 mm. (4.7 in.). This extrusion has a solid outside finish. This display is easy to mount on the wall because it is lightweight, but can also hang overhead or stand independently. VAIL-120DB is especially good for edge lights since its spine is shorter, holding the lights very close to the graphic's edges. When installing the fabric graphic, the silicone beading can fit slightly more than 12 mm. (.47 in.) deep and 4 mm. (.15 in.) wide into the silicone beading trough. This extrusion is compatible with edge lights or ladder lights (can be backlit).

Specifications

- 120 mm. (4.7 in.) wide aluminum profile
- Double-Sided graphic display
- Accepts 12 mm. keder

Functions

- Free standing display
- Wall mount display
- Suspended display
- LED Lightbox

Graphic Material

- Stretch Fabric (Non-Backlit)
- UV Backlit Fabric (Backlit)

Package Includes

- (1) 4-Sided Frame
- (1-2) Custom Single-Sided Graphics (SEG hem)
- (4) VAIL Triangle Corner Connectors
- (1) 3 mm. Allen Wrench
- (1) 5 mm. Allen Wrench

Available Options

- Vail Feet (Qty: 2)
- Yeti Feet (Qty: 2)
- Split Connector
- Resort Light Strip
- Power Switch
- Ladder Lights
- Wall Mount (Qty: 4)

BIG SKY-TRI

BIG SKY TRIANGLE is a corner extrusion that creates 60° angles. With a profile width of 34 mm. (1.34 in.), SEG fabrics install into groove on either side. Very similar to the BIG SKY-32D and BIG SKY-60D, BIG SKY-TRI creates three-sided counters, podiums, and towers in varied sizes. BIG SKY-TRI accepts three individual custom fabric graphics, excluding top and bottom. An inside corner extrusion can be added to make more complex shapes. You can add-on an acrylic countertop to convert the structure into a podium or counter display. LED lighting options are available to backlight your counter or tower to help your message really stand out. Also available in black.

Specifications

- 34 mm. (1.34 in.) wide aluminum profile
- Multi-Sided graphic display
- Accepts 12 mm. keder

Functions

- Podium/Counter display
- Tower display
- Backlit option

Graphic Material

- Stretch Fabric (Non-Backlit)
- UV Backlit Fabric (Backlit)

Package Includes

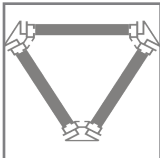

- (3) Custom Single-Sided Graphics (SEG hem)
- (3) Vertical Extrusion pieces with caps
- (6) Horizontal Extrusion pieces with connectors
- (1) Torx Key

Available Options

- Resort Light Strip
- Ladder Lights
- Acrylic Top

BIG SKY-32D

BIG SKY-32D is corner extrusion that creates 90° angles. With a profile width of 32 mm. (1.26 in.), SEG fabric installs into grooves on either side. Custom-made on the premises, the BIG SKY-32D extrusion creates four-sided counters, podiums, and towers in varied sizes. Standard BIG SKY Counters and Towers accept four individual custom fabric graphics, excluding top and bottom. An inside corner extrusion can be added to make more complex shapes. You can add-on an acrylic countertop to convert the structure into a podium or counter display. LED lighting options are available to backlight your counter or tower to help your message really stand out. Also available in black.

BIG SKY-60D

BIG SKY-60D is corner extrusion that creates 90° angles. With a profile width of 60 mm. (2.36 in.), SEG fabrics install into grooves on either side. Custom-made on the premises, the BIG SKY-60D extrusion creates four-sided counters, podiums, and towers in varied sizes. Over an inch thicker than the BIG SKY-32D, BIG SKY-60D is recommended for counters, tables, and large towers. Standard BIG SKY Counters and Towers accept four individual custom fabric graphics, excluding top and bottom. An inside corner extrusion can be added to make more complex shapes. You can add-on an acrylic countertop to convert the structure into a podium or counter display. LED lighting options are available to backlight your counter or tower to help your message really stand out. Also available in black.

Resort Extrusions. Not Your Average Retreat.

Custom Extrusion Frames • Silicone Edge Graphics

RESORT EXTRUSIONS

SEG Fabric Frame Systems

The Resort Extrusions line offers you the ability to customize your next display project. Within the collection, there are nine different aluminum profile shapes. Choose your extrusion shape, display width and height, and we build it for you. Captivate crowds by adding lights for a back-lit display. Affix finished frame to the wall, hang it overhead, or stand it independently. Retain your custom frame, and refresh with new graphics over time. Presentation is everything—make it impeccable with custom Resort Extrusions.
