# directprint.io

## Chromebook specialists

directprint.io is the only Chromebook specialized print management system designed specifically to address the challenges of printer management in Google for Enterprise and Education deployments.

## Local printing with cloud administration

The universal directprint.io driver works with your existing printer fleet, which means no expensive upgrade to Cloud compatible printers. All leading printer brands supported

The jobs stay on your network, no cloud print means less support calls.

Nothing to install on premise - zero servers required. Meaning that you can concentrate on operations not server hardware and configuration and maintenance.

## Insight

Get insight into who's printing what and when. Full audit trail over how many pages, colour / mono and ink usage and paper usage. Unique cost saving features will save toner/ink and paper, cutting your print resource costs.
