Sewer

Are there any sewer pipes nearby?

Sources: Urban Utilities

THINGS TO KNOW

Sewer mains carry wastewater away from properties to sewage treatment facilities. These mains are owned by Council or a local Service Authority. It is important to locate these pipes before you start any underground work, to avoid costly damage to the mains.

If you are planning to develop or renovate a property and the building work is close to or over water and sewer mains, you may be required to obtain approval from local Council or the Service Authority. You should also contact a surveyor or register professional to identify any underground services before commencing any work.

Note: The information provided identifies the location of large government maintained pipes only and does not identify all privately owned pipes that may exist underground. The location of pipes in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from.

The indicative pipe location is provided as a guide only and not relied upon solely before undertaking work.

Questions to ask

- Where is the sewer infrastructure located on the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?
- What can be built over or near the identified sewer infrastructure?
