Zoning

What zone is my property?

Sources: Brisbane City Council

THINGS TO KNOW

Zoning helps organise cities and towns by dividing properties into specific land use types, such as commercial, residential, industrial, agricultural, and public-use. This structured approach prevents disorderly development, making cities and towns more livable, navigable, and attractive.

Zoning rules determine how land can be used and developed, including identifying desirable developments like townhouses or apartment units near public transport. Zoning may also impose restrictions on building heights to preserve local neighbourhood views.

Local area plans provide even more specific details to protect an area's unique character or encourage growth in suitable places. These plans can modify zoning rules and influence development possibilities, supporting economic growth, preserving local identity, providing open spaces, and improving transport routes.

Note: To determine the development possibilities for your property, it's essential to review the planning documents provided by local authorities, contact directly, or consult with a practising town planner.

Questions to ask

- What does the zoning and local plan mean for the property?
- What land uses are suitable for the applicable zone and/or local plan?

LEGEND

-  Selected Property
-  Cr1 Character Residential (Character)
-  Ldr Low Density Residential

Sewer

Are there any sewer pipes nearby?

Sources: Urban Utilities

THINGS TO KNOW

Sewer mains carry wastewater away from properties to sewage treatment facilities. These mains are owned by Council or a local Service Authority. It is important to locate these pipes before you start any underground work, to avoid costly damage to the mains.

If you are planning to develop or renovate a property and the building work is close to or over water and sewer mains, you may be required to obtain approval from local Council or the Service Authority. You should also contact a surveyor or register professional to identify any underground services before commencing any work.

Note: The information provided identifies the location of large government maintained pipes only and does not identify all privately owned pipes that may exist underground. The location of pipes in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from.

The indicative pipe location is provided as a guide only and not relied upon solely before undertaking work.

Questions to ask

- Where is the sewer infrastructure located on the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?
- What can be built over or near the identified sewer infrastructure?

-  Maintenance Structure
-  Sewer Connection
