

Medium Density Residential Zone

Issues

The Medium Density Residential Zone (MRZ) provides predominantly for medium density residential development in *urban areas* with few constraints and that are within easy walking distance to public open space and commercial centres. Over the foreseeable future, while traditional single *residential unit* properties will likely remain a dominant feature within the Medium Density Residential Zone, the zone is anticipated to provide for a greater range of housing choices and improved affordability, with an increasing prevalence of housing typologies such as low-rise apartments, walk-ups, terrace housing, semi-detached housing and detached townhouses on smaller sections.

While it is recognised that more intensive residential development has the potential to generate adverse effects on established residential environments, it can and should be well designed so that the layout and scale of housing complements established neighbourhoods. However, care has been taken not to set development controls at such a level that the feasibility of development may be unduly compromised.

It is expected that any changes to existing amenity levels resulting from further residential intensification will be gradual. Such changes will be off-set by advantages gained from increased neighbourhood activity and vitality, better population support for commercial centres, an emphasis on good quality urban design, a greater range of housing options, better utilisation of existing public facilities and infrastructure, and reduced urban sprawl.

Commercial activities are discouraged in the Medium Density Residential Zone. However, some opportunities are provided for non-*residential activities* such as *community activities*, *visitor accommodation* and *retail activities*, while ensuring that residential amenity and character are not compromised and that the activity is sympathetic to the surrounding residential context.

Objectives

MRZ-O1 Density

Subdivision and development are consistent with the planned medium density built environment and are compatible with the amenity levels of medium density residential development.

MRZ-O2 Housing Capacity

Increase housing capacity, intensity and variety.

MRZ-O3 Amenity

Subdivision and development provide quality residential amenity for residents, adjoining *sites* and the street while acknowledging the potential for reduced on-site amenity due to increased *building* scale and density.

MRZ-O4 Non-Residential Activities

Residential activities remain the dominant activity in the Medium Density Residential Zone and any *non-residential activities* are compatible with residential amenity.

Policies

MRZ-P1 Residential Activities

To recognise and provide for the diverse accommodation needs of the community by:

1. Allowing for decreased *outdoor living space* and *landscaping* provided that public open space is conveniently accessible.
2. Enabling a variety of medium density housing types including apartments, terrace housing, semi-detached townhouses, compact detached townhouses and *multi unit developments*.

MRZ-P2 On-Site Amenity

To require *residential activities* to achieve good levels of on-site amenity by providing:

1. Useable *outdoor living courts*.
2. Sufficient access to sunlight throughout the year.
3. Adequate space to accommodate typical residential living requirements.

MRZ-P3 Outdoor Living Courts

To provide for development that infringes minimum *outdoor living court* and sunlight access requirements where the development is designed to minimise impacts on on-site amenity, including through access to:

1. Communal *outdoor living space*; or
2. Public open space that is conveniently accessible and of sufficient size.

MRZ-P4 Adjacent Properties

To mitigate adverse amenity effects on adjacent properties by sensitively designing development to:

1. Manage the intrusion of privacy and the extent of *building* dominance on adjoining *residential units* and areas of outdoor amenity.
2. Minimise the degree of overshadowing or obstruction of sunlight penetration to any adjoining *site or residential unit*.

MRZ-P5 Residential Amenity and Character

To manage adverse effects on residential amenity and character by requiring new developments to have regard to the way the development:

1. Provides street activation through connection between front doors and the street.
2. Provides *landscaping* and planting that enhances on-site and local residential amenity, with particular regard to *site frontage*.
3. Minimises large monotonous *building* facades and walls that do not include design variation or are not broken down into smaller elements.
4. Relates to neighbouring properties by employing *setbacks*, sensitive *building* orientation and design, and *landscaping* to mitigate dominance and privacy impacts.
5. Provides an active interface to *Open Space and Recreation Zones* on to which it fronts.
6. Is sympathetic to other *buildings* in the vicinity, having regard to bulk, scale and symmetry.

MRZ-P6 Impervious Areas

To restrict *impervious areas* within *sites* in order to:

1. Manage *stormwater* runoff.
2. Maintain and enhance *amenity values*.
3. Safeguard esplanade areas and waterfront walkways.

MRZ-P7 Supported Residential Care and Retirement Villages

To enable a range of appropriate *residential activities* by providing for *supported residential care* and retirement villages where they are designed, located and managed to:

1. Provide a high level of amenity for residents.
2. Ensure any adverse effects on surrounding *Residential Zones* and *Open Space and Recreation Zones* are minimised.

3. Maintain the residential character of the surrounding environment.
4. Avoid, remedy or mitigate any adverse effects on infrastructure, including the transport network.

MRZ-P8 Non-Residential Activities

To only enable non-residential activities where they:

1. Will not detract from the vitality and viability of *Business Zones*.
2. Are complementary in design, scale, nature and intensity to the residential context.
3. Avoid, remedy or mitigate adverse effects on residential *amenity values* such as noise, traffic, parking, lighting, glare and visual impact.

MRZ-P9 Comprehensive Design

To encourage *subdivision* and land use proposals to be undertaken concurrently as part of a comprehensive design process.

MRZ-P10 Subdivision

To promote design and layout of *subdivision* which achieves the following:

1. *Sites* are shaped and sized to allow adequate sunlight to living and outdoor spaces, and to provide appropriate on-site amenity and privacy.
2. Where possible, *sites* are located so that they over-look and front roads and open spaces.
3. *Rear sites* are limited.
4. A permeable street network where the use of cul-de-sacs is limited.
5. Pedestrian and vehicular connections within a development, and between developments and the public realm, are maximised.
6. Opportunities for connections to public open space, services and facilities in the neighbourhood are identified and created.
