DO YOU NEED A BUILDING PERMIT?

A GUIDE TO APPLICANTS FOR BUILDING PERMITS

WHERE DO YOU APPLY?

Kapiti Coast District Council
Ngarara Building
Rimu Road
PARAPARAUMU

BUILDING PERMITS ARE REQUIRED when

1. A new building is to be constructed.
2. There is to be a change to the existing structure of a building.
3. Any outbuilding is to be altered or constructed, ie sheds, glasshouses, conservatories etc.

4. When there is a change of use, ie a dwelling converted to flats, a warehouse converted to offices etc.
5. Where there is to be demolition in whole or part of a building.
6. The reinstatement of fire or other damage.
7. Any retaining wall over 1200mm high or which is erected a distance less than its height from the boundary.
8. Any tank or swimming pool erected.
9. Any wall or fence, other than a retaining wall, over 1800mm in concrete or masonry, over 2400mm in timber, or over 3600mm in framing and netting, is erected.
10. Any mast, pole, radio or TV aerial over 6300mm in height.
11. Any construction or platform that exceeds 5m² and 1200mm in height from its lowest ground level.
12. A tent or marquee exceeding 28m².
13. Any sign or hoarding or the repainting or refacing of any sign or hoarding.
14. Solid fuel heaters.

WHAT SHOULD YOU BRING?

Every application for a Building Permit, in accordance with NZS 1900 for a building purporting to comply with this standard, shall be accompanied by two copies of a properly drawn plan showing the following:

- (a) Site plan — 1:100 scale.
- (b) A floor plan of each floor level
- (c) An elevation of each external wall — 1:100 or 1:50 scale
- (d) A cross-section
- (e) The type and location of each foundation element (for example, reinforced masonry foundation wall, anchor pile, cantilevered pile, etc).
- (f) Adequate information on all subfloor, floor, wall and roof, framing, including the type and location of each subfloor brace, diagonal brace and wall bracing element, and the number of bracing units assigned to each wall bracing element.
- (g) The type and location of cladding, sheathing and lining.
- (h) And any other necessary information in order to show the exact nature and character of the proposed undertaking as required by NZS 1900: Chapter 2.
- (i) Two copies of a complete specification.

Plans to be in ink or prints, drawn to scale and clearly legible.

For domestic garages, glasshouses and minor alterations, the following is required:

- (a) Site plan — 1:100 scale
- (b) A floor plan of each floor level
- (c) An elevation of each external wall — 1:100 or 1:50 scale
- (d) A cross-section
- (e) Two copies of a complete specification.

If plans and specifications are not of an acceptable standard delays will result.

To Whom It May Concern

We Parapine Timber Paraparaumu Limited give our permission for Tom Taylor owner of 98 Langdale Avenue to erect a garage situated on the north east boundary backing onto our property at 100 Langdale Avenue.

Permission is given with the following conditions:

1. The building is constructed in accordance with all building and fire regulations.
2. The building will be and remain single story with the roof pitch being no greater than the existing house.

Yours faithfully

BUILDING PERMIT CONDITIONS & REQUIREMENTS

1. GENERAL REQUIREMENTS

- (a) The District Building Inspector is to be given 24 hours notice before carrying out the following inspections, before placing any concrete/placing foundations and again before fitting any internal linings and upon completion of the work.
- (b) To arrange for any of the above mentioned inspections by the DISTRICT BUILDING INSPECTOR please contact either Ken Smith or Plumbing & Drainage Inspector on 85139 between the hours of 8.00am and 4.30pm
- (c) All work is to be carried out in accordance with the Kapiti Coast District Council Bylaws, and in particular with the following SPECIAL REQUIREMENTS:

NOT APPROVED AS A HABITABLE BUILDING
FOUNDATIONS TO APPROVED SOIL BEARING
75 x 50 PURLINS TO BE FIXED ON EDGE.

NB: It is the owners responsibility to ensure the satisfactory overall standard of the workmanship. The issue of the Building Permit does not in any way guarantee or imply continuous supervision of the works by the District Building Inspector.

STRUCTURAL SUPERVISION: All structural work is to be supervised or observed by the Engineer responsible for design who shall furnish a certificate to the District Inspector on completion of the structural work verifying that the work has been completed in accordance with his plans and specification as approved in the building permit and that the workmanship is of satisfactory quality.

I have read the foregoing requirements and the Owner/Builder/Authorised Person hereby agrees to comply with them.

IMPORTANT

An additional inspection is now required for all buildings once internal linings have been installed and prior to GIB stopping, fitting of skirtings and scotia contact building inspectors

A GUIDE TO APPLICANTS FOR BUILDING PERMITS

NOTE:

The following information is intended to be used for guidance only and should not be taken as the completed procedure which applies on all occasions. More detailed information is available from the building Inspectors Office.

PLANS AND SPECIFICATIONS

1. Plans and specifications submitted for approval must be in duplicate and of sufficient clarity to show the exact nature and character of the proposed undertaking and the provision made for full compliance with the requirements of the Building Bylaws and Codes of Practice. Elevations must clearly and accurately indicate existing and proposed ground levels.
2. All drawings must be in ink on good quality drawing paper, and must be accurately drawn to metric scales and the appropriate scales denoted on the plans.
3. All drawings, calculation sheets, and other data submitted must be **SIGNED** by the person responsible for the design, and shall clearly identify that person and his/her firm or organisation.
4. Elements of a building structure which exceed the provisions for non-specific design are required to be supported by structural calculations and drawings.
5. All Engineering calculations submitted must be accompanied by an appropriate Design Certificate and signed by the Registered Engineer responsible for their production.
6. Building permit applications for work involving plumbing and drainage must be accompanied by a relevant and **completed** Plumbing and Drainage application.

Applications submitted which are incomplete or contain insufficient details will be subject to unavoidable delays in permit issue.

DWELLINGS AND ACCESSORY BUILDINGS

Council's District Planning Scheme lays down various requirements with respect to the siting of buildings, and the following information is intended as a **guide** to these requirements.

1. SITING AND LOCATION OF DWELLINGS

Dwellings shall be sited no closer than the following distances from boundaries:

Residential Zones	Front Yard	Rear Yard	Side Yard
Front Site	4.5m	3.0m	One side 1.5m Other side 3.0m

Rear Site	3.0m from all boundaries
Corner Site	4.5m (from all street boundaries)

Rural Zones

Sites Under 2000m ²	9.0m	3.0m	3.0m
Sites Over 200m ²	9.0m	4.5m	4.5m

Daylighting (Height Slope Factor) — 2.7m — 56°

2. RELOCATED DWELLINGS

Residential Zones — permitted as a Conditional Use, which needs specific planning consent from Council.

Rural Zones — Specific planning consent not required, but subject to the following.

All buildings for relocation need to be in sound condition and subject to inspection and approval by Council's Building Inspector prior to the issue of the building permit. An inspection fee is payable, which may include additional charges for travelling expenses out of the County.

3. ACCESSORY BUILDINGS (GARAGES, SHEDS, CARPORTS, ETC.)

Residential Zones — detached accessory buildings shall be located a minimum of 0.9m from a boundary, provided that the dwelling on the same site is at least 1.5m away and that an adjoining dwelling is more than 3.0m away, and the accessory building is no greater than 9.0m in length. Buildings closer than 0.9m to a boundary are required to be constructed of fire resistant materials that comply with Council's Building Bylaws. The neighbours consent is required. Detached buildings must be located no further forward than any existing or proposed dwelling on that site.

Rural Zones — detached accessory buildings and farm buildings may be located within 4.5m of a boundary as a general rule.

Accessory buildings which are attached to dwellings are subject to the same siting requirements as the dwelling.

In all cases eaves, including spouting may project not more than 800mm over any yard.

MM DEVELOPMENTS

P.O. BOX 91 — PARAPARAUMU

3rd August 1989

Parapine Ltd,
Hinemoa Street,
Paraparaumu.

Attention: Mr.P.Leith.

Dear Sir,

LOTS 42 TO 45 AND LOTS 70 AND 74., LANGDALE AVENUE,
SUBDIVISION OF TOWER LAKES, PARAPARAUMU.

As requested we have carried the site surveys of the sections listed above on the Tower Lakes Subdivision and our report is as follows:

SITE CONDITION.

The sites are located in the lower lakes subdivision on the Eastern side of Langdale Avenue. The original ground consisted of two natural sandhills extending from the road frontage to the rear boundary of the properties. The sandhills were separated by a drain coming from the rear properties. Recently the two sandhills have been substantially removed to provide flat platforms covering most of the sites tested, prior to the replacement of the topsoil the sites were graded and rolled. The finished levels above the kerb are approximately 1000mm for Lots 74 and 42, and 1000mm for Lots 44, 45 and 70.

SITE TESTING.

Site testing consisted of a series of Scala Penetrometer readings at various positions on each site and these are shown on the accompanying site plans. The majority of the site survey markers were not immediately apparent and the locations of the tests are only approximate.

RESULTS.

In general the sites consist of 150mm of topsoil overlying grey sand that has generally been compacted to a depth of 1300mm where there is a layer of dense compacted sand. The results of the Scala Penetrometer tests are attached to the relevant site plans.

LOT 42. - The tests conducted show the variable nature of compaction, tests 1 and 4 are acceptable though 4 is only marginal but tests 2 and 3 show a layer of sand between 800 and 900mm below the surface which has not been adequately compacted.

LOT 44. - On this site the results are more marked. Test 1 is satisfactory but 2, 3 and 4 are not satisfactory with soft sand being recorded to a depth of 1100, 700 and 800mm below the surface respectively.

LOT 45. - On this site the results for test 2 and 3 are satisfactory but 1 and 4 show soft conditions to depths of 900 and 1000mm below ground respectively.

LOT 70. - The results on this site were poor on the North side with tests 2 and 3 recording soft conditions to a depth of 1100mm below ground level. Test 1 was satisfactory.

LOT 74. - As previously advised this site has one test that was satisfactory and three, being numbers 1, 3 and 4 where the results show a layer of sand not adequately compacted at depths of 800 to 900mm below the surface.

CONCLUSION.

The tests were carried out in positions on the sections approximately where it was felt dwellings are likely to be erected, no building sites were defined. The results indicate areas where adequate compaction has been achieved on each site but large areas do not meet the requirements as set out in NZS 3604. As the sites do not meet the minimum code requirements of NZS 3604 the foundations of any residential dwellings will have to be specifically designed. The alternative solution is to define the building areas and compact the ground in these areas to the requirements of NZS 3604.

Should you require any further information please contact the writer.

Yours faithfully,
MMDEVELOPMENTS.
