COMPANY PROFILE

One of the most popular customized wear-resistant parts expert in the world

As a leading manufacturer of wear-resistant castings in China, We Specialize in the production of high manganese steel, high chromium cast iron, alloy steel and other crusher accessories, annual output break through 15,000 tons. Our products are served for jaw crusher, cone crusher, impact crusher, ball mill, Raymond mill, sanding machine and other types of machine in mining, sand, cement, chemical industries more than 20 years. The main products are: jaw plate, mantle, bowl line, hammer, blow bar, liner, roller, mill ring etc. HF has a comprehensive production base of more than 50,000 square meters ,with over 230 employees, and more than 30 technical, R&D and QC teams.

MANUFACTORY EQUIPMENT

- Machining equipment
gantry milling machines, vertical lathes, facing out, grinding machine and boring machine etc.
- Manufactory facility
medium frequency induction furnaces,
sand treatment, molding line and heat treatment
furnaces (with 500 tons of water toughening pool)

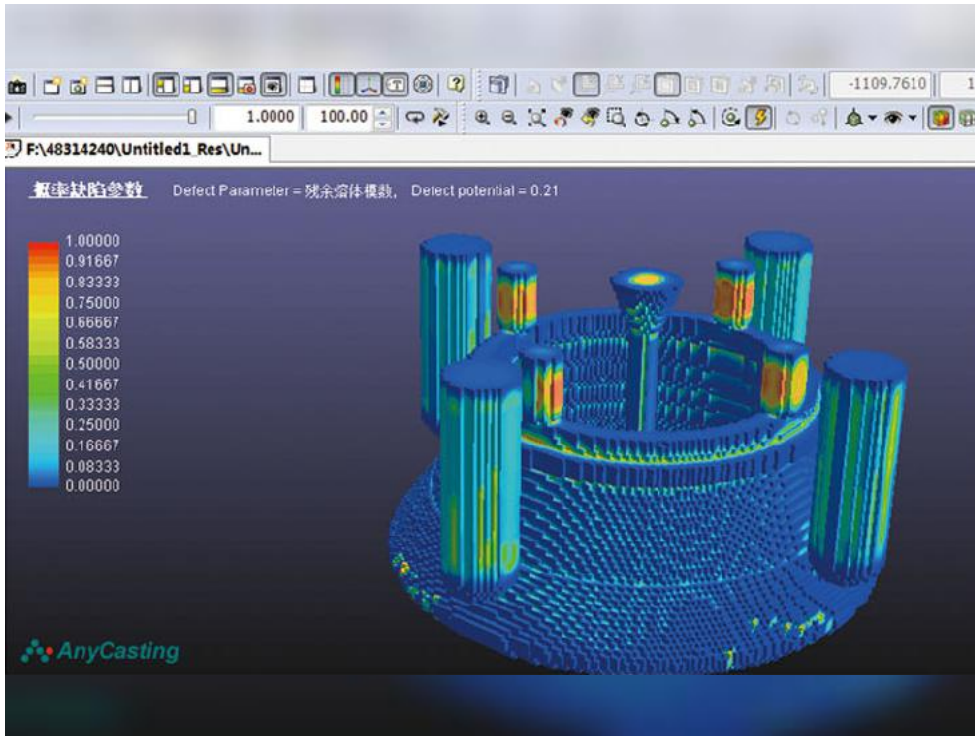

TESTING TECHNOLOGY

We own test labs such as spectral chemistry analysis room , mechanical hardness analysis room, metallographic test room to make sure each batch of qualified products.

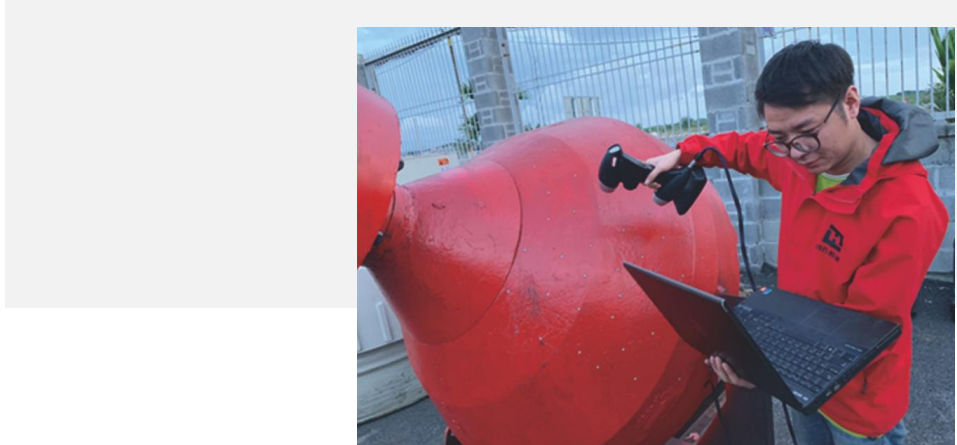

DETECTION

Simulated pouring system

- The system can effectively supervise and avoid the design defects in the casting process. Strictly check the sizes and angles so that the casting is controlled within the tolerance range of the drawings.
- PT inspection ensures timely detection of defects of microstructure during the inspection process
- The 3D scanner makes the casting conform to the overall geometry, ensuring perfect installation and fitting with the machine.

STRONG PRODUCTION CAPACITY

Annual capacity: 15,000 tons!
