

SEMPERTRANS SPLICING KITS

ENGINEERED FOR THE UNCOMPROMISED PERFORMANCE OF YOUR CONVEYOR BELT

PRODUCT SHEET

BENEFITS

- Manufacturer designed and approved
- Suitably packed, professionally labelled and MSDS ready paperwork
- Available ex-stock for prompt delivery
- Component quantity, thickness and type tailored to belt width, strength and compound

SEMPERTRANS SPLICING KITS

The quantity and specifications of the components for each splicing kit vary depending on the particular type of conveyor belt. Our expert team is always able to dispatch the appropriate kit efficiently, which is especially important in urgent situations where downtime is a factor.

We put the same effort and attention to detail into perfecting our splicing kits as we have into making the high-quality conveyor belts they connect.

Only our splicing kits are designed and engineered specifically for our belts, to provide optimal strength and flexibility while maintaining efficiency and durability.

Steel Cord Belt Splicing Kits

Kit components:

- Rolls of cover rubber in sheet form
- Rolls of core (bonder) rubber in sheet form
- Intercord rubber strips
- Hot vulcanizing rubber solution
- Nylon cloth or silicon paper release material
- Rubberised textile or steel reinforcement

SPLICING KIT STEEL

Textile Belt Splicing Kits

Kit components:

- Rolls of cover sealer rubber in sheet form
- Rolls of skim (adhesive) rubber in sheet form
- Hot vulcanizing rubber solution
