

Utilities Feature Checklist

Mobility must-haves for utilities

Today's high-performance utilities sector requires field service workers to be empowered with the right tools to capture, assess and share critical data in a variety of tough conditions.

Zebra provides an ecosystem of ruggedized, purpose-driven mobility solutions to give field-service technicians access to real-time data with real-time guidance through reliable, collaborative mobile workflows.

Mobility tips from Zebra's utility industry experts

Invest in an adaptable, expandable platform.

Device flexibility is essential in meeting the wide-ranging demands of the field.

Embrace constant feedback from the field.

Your end-users will tell you if mobile solutions really are performing to your standards—and theirs.

Find a feature combination to suit all your workflows.

Make sure your rugged mobile device is truly mobile, not just portable. And choose the option that offers the right level of protection, computing power and connectivity for you.

Key mobile computing requirements for utilities

Truly rugged:

Mobile workers are constantly exposed to the elements, and heights—and so are their devices. Only authentic rugged devices are built to perform under pressure.

Fully mobile:

Any rugged device intended for the field should be easy to carry, using either a handle, carrying case or a combination of the two. Our mobile computers and tablets enhance are compact and easy to use wherever you're working.

A true mobile computer:

Whatever the form factor, Zebra rugged devices offer processing power, storage capacity, real-time communications and overall performance on a par with traditional computing systems.

Office-on-the-move functionality:

Create a fully-functional in-vehicle office solution with docking station, companion keyboard and mobile printer, and more.

Connectivity without compromise:

Choose a solution that offers the right physical and digital connectivity options, including I/O ports, USB and a barcode scanner. 4G LTE, Wi-Fi®, Bluetooth® and satellite GPS are also critical for constant data connectivity.

Full-day battery life:

Utility work happens around the clock. Hot-swappable batteries let you recharge without taking a break.

From touch-sensitive to outdoor-viewable displays:

A range of screen sizes and optimum visibility ensures the right data can always be seen.

Full-day battery life –

Utility work happens around the clock. Hot-swappable batteries let you recharge without taking a break.

Why Zebra is the right mobility partner

Zebra rugged mobile computers and tablets help utilities power more workflows in the field, generate new efficiency gains across their operations and distribute real-time data more fluidly between teams, customers and assets.

Assured performance in the field

- IP54 IP65 IP67 IP68 MIL-STD810G Drop, Humidity, Shock, Vibration C1D2/ATEX
- Many I/O port options: RJ-45, True Serial , HDMI, USB and more
- High capacity warm-swap or hot-swap batteries
- Windows and Android OS
- Complete cellular network flexibility
- Fast, reliable wi-fi connectivity
- 4G XLTE/LTE, Bluetooth 5.0, satellite GPS
- High-quality barcode scanning and imaging
- Ultra high-resolution photos and videos
- High-volume speakers and noise-cancellation technology

Please contact your Zebra representative for most up-to-date information

Purpose-built for utility workflows

- Asset lifecycle management
- GIS mapping
- Inventory management
- Real-time asset monitoring
- Work orders
- Customer service
- Inspections
- Maintenance and repair scheduling and completion
- Safety audits and compliance reporting

Responding to utilities' ever-changing needs

Zebra is committed to working with utility customers to identify challenges and meet your exacting operational needs. Our product range has been developed to meet your specialized mobile computing requirements:

XSLATE R12 – Rugged 12.5” tablet with 2-in-1 capabilities

XSLATE L10 – Supremely rugged 10.1” slate tablet PC

XPAD L10 – Supremely rugged 10.1” hard-handle tablet PC

XBOOK L10 – Rugged 10.1” 2-in-1 laptop replacement

ET51/56 – Rugged 10.1” and 8.4” enterprise tablets

TC72/77 – Ultra-rugged enterprise mobile handheld touch computer

TC52/57 – Rugged enterprise mobile handheld touch computer

Total mobility solutions for utilities

Zebra offers a comprehensive range of mobility solutions, software and support for utilities, helping you to maintain a performance edge and optimize your mobility budget:

- OneCare Support Services deliver unmatched technical support and repair services to help ensure predictable performance and uptime
- Visibility Services monitor, manage and track the utilization and health of devices for better business outcomes and maximum ROI
- Mobility DNA effortlessly connects devices with enterprise applications, administration utilities and development tools
