

Electronic Signatures Meet Needs in the Remote Working Environment

As businesses struggle to meet the needs of their customers and employees, Farm Credit associations across the country continue to deliver on their mission to support agriculture and rural communities, though now with their employee teams primarily working from their homes. In this remote work environment, where social distancing is encouraged between all but our immediate 'cohort,' getting loan agreements, contracts and employee onboarding documents signed can seem overwhelming.

OneSpan, a Passkey Partner, offers a robust, secure solution, OneSpan Sign, to enable electronic signatures that meet regulatory requirements. Any time a document needs to be signed, from a mortgage contract to a vacation request, OneSpan's e-signature platform can enable you, your customers and your employees to "sign on the dotted line" from the convenience of a computer or mobile device.

Complicating things even further right now is the Paycheck Protection Program (PPP) offered through the Small Business Administration, which carries specific signatory requirements. OneSpan has analyzed the specific e-signature requirements of the PPP and developed a [summary checklist](#) to assist you in navigating your current loan environment.

"Throughout this pandemic, OneSpan has supported our clients' business continuity by enabling business processes that require signatures to continue seamlessly in the remote environment," says Sameer Hajarnis, practice leader for e-signatures and agreement automation with OneSpan. "These efficiencies will continue to benefit organizations even after states re-open their economies, because some customers may still be hesitant to visit an office."
